CHAPTER 1

GETTING STARTED

U.S. Ski & Snowboard is an Olympic sports organization providing leadership and direction for tens of thousands of young skiers and snowboarders, encouraging and supporting them in achieving excellence. By empowering national teams, clubs, coaches, parents, officials, volunteers and fans, U.S. Ski & Snowboard is committed to the progression of its sports, athlete success and the value of team.

Thank you for your participation in U.S. Ski & Snowboard programs. These programs provide opportunities for athletes to develop skiing or snowboarding skills in a competitive and educational environment, from grassroots club programs up through national teams and the Olympics. This competition guide is a roadmap for various programs, rules and rankings.

U.S. Ski & Snowboard supports athletic programs in skiing, snowboarding and freeskiing. U.S. Ski & Snowboard clubs make up over 390 professional coaching outlets for athletes and logistical support for competitions. These clubs, with both professional staff and volunteers and comprised of nearly 35,000 members, are the backbone of the U.S. Ski & Snowboard, supporting individual athletes and managing most of the organization's domestic competitions. In the 2017 season, our resort partners, clubs, officials and volunteers hosted more than 4,300 domestic competitions with more than 190,000 athlete starts being recorded.

Services provided by U.S. Ski & Snowboard are based around the three "R's": rules, races and rankings. Rules are established to ensure a consistent and fair playing field for all athletes. Races, or competitions, are the backbone of the U.S. Ski & Snowboard's programs, providing competitive opportunities for athletes. Rankings are a means of evaluating performance in competitions to determine advancement on the athlete development pipeline or to assist in determining start positions in specific competitions.

U.S. Ski & Snowboard provides educational resources to key constituent groups through the Center of Excellence, the organization's national training and education facility. Education is provided to athletes, parents, officials, coaches and clubs in areas such as sport technique, fitness and exercise, sport science and sports medicine.

U.S. Ski & Snowboard regions and divisions are volunteer-run programs which implement programs within small, multi-state geographic areas, including scheduling of divisional competitions, selection of divisional teams and training of competition officials.

Athletic Advancement

Now that you are a U.S. Ski & Snowboard member, you have access to compete in sports both in your home area and nationally. The following are steps you can take to make the most out of your competitive skiing or snowboarding experience.

Join a Club - Linking up with a club will allow you access to the best professional coaching and logistical support. A complete club directory is available at usskiandsnowboard.org.

Compete - Pick the proper competition programs for your age and ability. Contact the event organizer or your local club for entry information. U.S. Ski & Snowboard programs offer both introductory non-scored events for youth athletes to promote skill development and fun, and scored competitions to improve ranking.

Ranking - Compete in U.S. Ski & Snowboard scored competitions to gain a ranking, which will be used for advancement up the athlete development pipeline. You can monitor your ranking at usskiandsnowboard.org.

FIS Competition - As you advance up the pipeline with your U.S. Ski & Snowboard ranking, you may be eligible for ranking on the International Ski Federation (FIS) ranking list. Check with your club coach or divisional contact for more information. FIS registration is managed through U.S. Ski & Snowboard. You can monitor your FIS ranking and register for FIS at usskiandsnowboard.org.

Team Selection - As you continue to advance, your ranking may qualify you for a regional or divisional team. This includes the Junior Championships, U.S. Championships and all the

way up to the U.S. Ski & Snowboard Teams.

Each U.S. Ski & Snowboard sport has a specific development pipeline with defined action tips designed to educate athletes in every age group as they progress in their sport. Please see the development pipeline for your particular sport by logging on to usskiandsnowboard.org and selecting your sport.

Where to Find More Information

As you continue competitive skiing or snowboarding, you might have questions along the way. The following are helpful resources to guide you on your path to success.

Website - usskiandsnowboard.org is the best source of member information. There you will find contact information, criteria and advancement protocol on your sport as well as the latest in national news from your sport. You can also search the Knowledge Base for answers to many of our member's most common questions.

Competition Guide - This handbook is a guide for athletes, parents, coaches and officials that provides a roadmap to U.S. Ski & Snowboard programs. Here you can find information on rules and rankings for your sport.

Local Club - Clubs are the heart of the sport. These organizations have the background and knowledge to help answer most of your questions. Check your local club for information on schedules and qualifying procedures within your division.

Regional/Divisional Contact - Each region and division for your sport has a contact person who can help you answer questions. Contact information appears in the front of this competition guide and at usskiandsnowboard.org.

National Office - Every sport has full-time staff in U.S. Ski & Snowboard's national office in Park City, UT. Contact the office at 435.647.2666 with national membership or ranking questions. For a quicker response, please send an email to the contact links found at usskiandsnowboard.org.

Membership Categories

U.S. Ski & Snowboard offers a variety of membership opportunities depending on your area of interest. You can join online at usskiandsnowboard.org. Your membership will be processed immediately while FIS membership may take up to one week.

Coaches, officials and club volunteer members are required to undergo periodic background screening to activate membership.

General Member - The low-cost General membership is designed for young athletes who are training with a club program but not participating in sanctioned events. It is also perfect for club volunteers or parents who are starting to become active in support of club activities and events as well as those forerunning in sanctioned events. Not intended for those in a position of authority over minors. Not eligible for those participating in sanctioned events.

Rookie - For ages 13 and older prior to Dec. 31. Available to first time Freestyle/Freeskiing members only. This membership gives athletes who are just getting started the opportunity to learn and grow within their sport at the division competition level. Athletes also have access to the national Freestyle/Freeskiing ranking list.

Competitor - For all ages, the Competitor membership provides access to all levels of scored and non-scored competitions at the local, divisional, regional and national level. Competitor memberships include scoring on national ranking lists as well as FIS ranking lists where appropriate (with additional FIS license). This membership is required for FIS registration and FIS level competitions.

FIS License - Athletes with a FIS license may compete in FIS sanctioned competitions and will be scored on the international points and ranking list. Athletes must have the U.S. Ski &

Snowboard Competitor membership to obtain a FIS license. Athletes should only apply for a FIS license if they meet the FIS age requirements for their discipline. FIS license must be obtained prior to competition; day-of sign-ups are not possible.

Official (with background screening) - For ages 15 and older prior to Dec. 31. U.S. Ski & Snowboard events are managed by officials. Each official is periodically background screened to help provide a SafeSport environment in clubs. Officials are able to achieve certification through educational programs.

Coach (with background screening) - For ages 15 (freestyle) or 18 (freeskiing) and older prior to Dec. 31. Coaches are the backbone of the development pipeline, providing leadership to athletes through club programs. Every coach member undergoes periodic background screening to help provide a SafeSport environment in clubs. In addition, coaches are required to take a short online education program on important coaching guidelines. U.S. Ski & Snowboard also provides coaches with an in-depth sport education program, helping them achieve various certification levels in their sport. Note: Required for access to coaching credentials at all sanctioned competitions. Issuance of credentials to appropriate working coaches is the responsibility of the event.

Club Volunteer (with background screening) - For ages 15 and older prior to Dec. 31. The Club Volunteer membership is designed for parents and club volunteers who undertake a leadership role in clubs, divisions, regions, competitions and club training sessions. Each club volunteer undergoes periodic background screening to help provide a SafeSport environment in clubs. This membership is a good stepping-stone to becoming a coach or official, and is fully upgradable during the season. Applicable for those in a position of authority over minors. Not eligible for official's certifications.

Age Classification

Age classification is based upon the year an athlete was born, regardless of the date of birth.

Class	Age	Year of Birth
U7	6 and younger	2011 and later
U9	7 and 8	2010 and 2009
U11	9 and 10	2008 and 2007
U13	11 and 12	2006 and 2005
U15	13 and 14	2004 and 2003
U17	15 and 16	2002 and 2001
U19	17 and 18	2000 and 1999
Senior	19 and 20	1998 and 1997
Veteran	21 and older	1996 and earlier

Code of Conduct

A condition of membership is the agreement to abide by the U.S. Ski & Snowboard Code of Conduct including provisions regarding drug testing. The Code of Conduct can be found near the end of this guide.

PARENTS

Your son or daughter is on their way to growing their career in skiing or snowboarding. Supporting them in their endeavors is the number one way to help them achieve success. However, there are other ways to participate along the way to enhance the experience of competitive skiing and snowboarding.

Become a volunteer - The club system exists because of the help and dedication of volunteers, including parents of competitive athletes. A great way to be a part of the team is to become an official. Parents may attend officials clinics and work out of town competitions so that they will be better able to help with competitions at their own venues. Another way to be involved is to serve on steering committees and competition committees for a sport. Contact your sport staff for more information.

Education - U.S. Ski & Snowboard provides a variety of educational opportunities for parents. Through usskiandsnowboard.org, local clubs and U.S. Ski & Snowboard produced educational resources, parents can gather information to help support their child in their quest towards victory. The Successful Sports Parenting DVD, produced in partnership with USA Swimming, featuring Deborah Phelps, mother of Olympic and World Champion swimmer Michael Phelps, is a suggested guide to lead you through tips to support the development and success of young athletes. Find more information at usskiandsnowboard.org.

Stay involved in your child's club - Ask questions to club leaders, look at annual reports and attend orientation if offered. These activities will help you better understand your child's club and the development pipeline.

Freestyle / Freeskiing Parent Code of Conduct

U.S. Ski & Snowboard Freestyle / Freeskiing has established the following Code of Conduct as a recommendation for parents to help guide successful competition and training for all participants. U.S. Ski & Snowboard is fortunate to have many highly experienced, professional coaches and officials working to help develop our skiers into better athletes and to deliver fair and enjoyable events. The behavior of parents during training and competition has significant influence on the experience of their children and others while participating in sport. The parent code of conduct that was developed as a standard to emphasize U.S. Ski & Snowboard's commitment to making everyone's involvement a positive experience.

As a parent of a Freestyle / Freeskiing athlete, I will abide by the following guidelines:

1. I will remember that children participate to have fun and that the event is for youth, not parents.
2. I will teach my child that doing one's best is more important than winning, so that my child will never feel defeated by the outcome of his/her performance.
3. I will emphasize that skill development and training hard will benefit my child over winning. I will also de-emphasize competition results in the younger age groups.
4. I will promote the emotional and physical well-being of all participants ahead of any personal desire I may have for my child to succeed.
5. I will abide by all rules of skier safety, including those local rules set forth by individual ski areas and event organizers while at supported events. This includes rules pertaining to access to the venue.
6. I will conduct myself in a sportsmanlike manner at all times.
7. I will treat all coaches, employees, officials, volunteers, other skiers and parents with courtesy and respect. Abusive language towards coaches, athletes, parents, officials, volunteers, ski area personnel, or my own children will not be permitted or tolerated.
8. I will refrain from coaching my child or other athletes during events and training, unless I am one of the official coaches of the team.

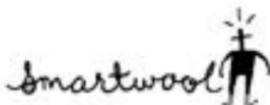

9. I will respect the coaches, judges and officials and their authority and responsibilities during an event. I understand that during competitions, questions or concerns regarding decisions made by officials are directed to a member of our coaching staff. Parents address officials via the coaching staff only.

10. I will use proper channels of communication that is both professional and courteous, this will be key to any well run organization. All parents should direct any comments or questions in a professional manner to their child's coach. That coach is their first line of support. If questions or comments go unanswered, then the club program director or division chair-person, will be the parent's secondary line of support.

The Parent Code of Conduct is not meant to restrict the parent's access to enjoy and be involved in events. We encourage open communication between parents, athletes and coaches with an understanding of the appropriate place and time. We encourage parents to be active at events through volunteering and participating on organizing committees. With parent support, events can provide rewarding and enjoyable experiences for all involved.

Thank You

to the following uniform partners
of U.S. Ski & Snowboard

INSURANCE COVERAGE

U.S. Ski & Snowboard requires Members to have valid and sufficient primary medical / accident insurance coverage and to accept full responsibility for understanding the provisions of such coverage as a condition of becoming a member and participating in official U.S. Ski & Snowboard training and competition. Such primary coverage must be in effect for the entire term of the membership year in order for the member to have coverage under U.S. Ski & Snowboard's excess accident medical policy. Members must carry proof of primary insurance and such proof must be available at each event so that prompt medical/hospital care can be authorized, if needed. U.S. Ski & Snowboard provides properly registered members with excess accident medical coverage, as follows:

Excess Accident Medical Insurance for Members of a Member Club

Current U.S. Ski & Snowboard Members of a U.S. Ski & Snowboard Member Club have excess accident medical coverage during sanctioned or registered events including official training (as defined by the policy) at such events. Please see americanspecialty.com/ussa_cov/ for a detailed description of coverage.

Excess Accident Medical Insurance for Members of a CLIP Member Club

Current U.S. Ski & Snowboard Members of a U.S. Ski & Snowboard CLIP Member Club have excess accident medical coverage during skiing and snowboarding competition, while training to compete and conditioning to compete in ski and snowboard competition that is supervised by a U.S. Ski & Snowboard representative and/or representative of a CLIP Member Club, and during club activities that are supervised by a representative of a CLIP Member Club. Please see americanspecialty.com/ussa_cov/ for a detailed description of coverage including a list of activities that are excluded from the policy.

Liability Insurance

U.S. Ski & Snowboard will provide liability coverage for:

- Event Organizers with respect to their ordinary negligence if such is alleged to have arisen in connection with competition in or conduct of sanctioned events (meaning a Schedule Agreement has been executed) and/or activities conducted or approved by U.S. Ski & Snowboard (including official training at such event as defined by the policy). Please see americanspecialty.com/ussa_cov/ for a detailed description of coverage.
- CLIP Member Clubs and the members and supervisory staff of such clubs and member coaches and officials while acting in their capacity as such on behalf of CLIP Member Clubs. Such coverage applies during (1) ski and snowboard competition; (2) while training to compete and conditioning to compete in ski and snowboard competition that is supervised by a U.S. Ski & Snowboard representative and/or representative of a CLIP Member Club; and (3) during club activities that are supervised by a representative of a CLIP Member Club. Please see americanspecialty.com/ussa_cov/ for a detailed description of coverage, as certain club activities are not automatically covered.

Note: This summary provides a general overview of insurance coverage that applies for U.S. Ski & Snowboard members. It is not a complete explanation of all policy provisions or specifics of the policy benefits. No coverage is extended, and no representations are made, other than what is stated in the actual insurance policies.

2018 U.S. SKI & SNOWBOARD

GOLD PASS

ONE PASS. 250 RESORTS. ALL ACCESS.

AS MEMBER OF THE GOLD PASS CLUB YOUR GENEROUS GIFT WILL PROVIDE YOU:

- Unlimited exclusive access to over 250 resorts across the U.S.
- The ability to entertain clients and share with friends and family
- VIP tour of the Center of Excellence in Park City, UT
- Team insider information via eNewsletters

USSKIANDSNOWBOARD.ORG/FOUNDATION

CHAPTER 2

POINTS AND RANKINGS

The ability to measure one competitor's performance against another is the heart of competitive athletics. And in a country as large as the USA, it's important to have measurement tools to evaluate performance of skiers around the nation.

The freestyle/freeskiing points system has been developed to do just that - provide a measurement tool for freestyle/freeskiing competitors around the USA. It is an important tool for personal evaluation and team selection at many levels.

The Points and Ranking chapter of the Freestyle/Freeskiing Competition Guide outlines the basics of the freestyle/freeskiing points system (FFSP) and how you can use it as a tool to measure your performance.

The points list is available at usskiandsnowboard.org.

POINTS LIST

Any event with a properly completed schedule agreement that is in accordance with current U.S. Ski & Snowboard, FIS and Freestyle/Freeskiing Sport Committee policies will be entered into the FFSP system (excluding water ramp competitions).

Only Competitor members can accumulate FFSP's.

The membership and competition season runs from July 1 to June 30.

Points List Purpose

1. To rank all competitors according to their performances in each competition and individual discipline.
2. To ensure each event is rated according to the quality of competitors entered, thereby providing a uniform ranking system for all performances and for all events in which an athlete competes.
3. To encourage competitors to enter events against higher ranked competitors.
4. To be utilized as a selection tool for upper level events.

2017-18 Freestyle/Freeskiing Points List Schedule

List	Period	Close	Valid
Fall List		Nov. 1	Nov. 3
1	July. 1 - Jan. 2	Jan. 2	Jan. 5
2	Jan. 3 - Jan. 23	Jan. 23	Jan. 26
3	Jan. 24 - Feb. 20	Feb. 20	Feb. 23
4	Feb. 21 - Mar. 6	Mar. 6	Mar. 9
5	Mar. 7 - Mar. 27	Mar. 27	Mar. 30
6	Mar. 28 - June 30	June 30	June 30

Note: The closing date reflects the deadline for receiving results to be included on the list being run. The valid date is the date on which the list will be available.

EVENT SCORING

Moguls and Aerials Event Scoring

1. Each mogul and dual mogul event is rated by the quality of competitors entered. Therefore, the point worthiness of each competition will vary with the caliber of skiers participating. Meet rating points will be equal to the average of the two highest FFSP among the top four finishing mogul competitors in that event and among the top four finishing dual mogul competitors in that event.

Aerial events do not have event ratings.

The winner of the mogul event is awarded freestyle points (FFSP's) equal to the average FFSP of the people who rated the competition. All other competitors in that event are given FFSP's in the same proportion to the winner's FFSP's that their score was to the winner's score. (Example: winner scores 70 in a 724 point event, competitor scores 64. That competitor will be awarded an $(64/70) \times 724 = 661.94$).

If none of the competitors in an event have any FFSP's in the event, then the minimum event raking is 100.

2. The maximum points for an event in all disciplines is 1000, the minimum point value for an event in all disciplines is 100.
3. FIS events will be scored using the FIS event rating.
4. Dual mogul events with less than 13 competitors will be scored with a special formula determined by the FFSC.

Event Ratings - Moguls and Dual Moguls

Event	Max Points	Type
World Cup/World Champs/OWG	1000	Fixed
U.S. Championships	956 (912 floor)	Float
Jr. World Championships	956 (912 floor)	Float
U.S. Selection Events	956 (850 floor)	Float
NorAms	912	Fixed
Jr. National	912 (850 floor)	Float
Europa Cup	912 (850 floor)	Float
Divisional Events	850 (100 floor)	Float

Moguls and Aerials Competition Rule

1. A skier receiving a Did Not Start (DNS) for an event will not be credited for event attendance for FFSP purposes.
2. A skier receiving a Disqualified (DSQ) for an event will not be credited for event attendance for FFSP purposes.
3. A skier receiving a Did Not Finish (DNF) for an event will not be credited for event attendance for FFSP purposes and will receive a zero for the event.
4. In national mogul events, each skier will take a minimum of one run. Up to a two run format will be scored to the FFSP, the higher of the two runs, or the only run for those eliminated from a second run in elimination format events, will be used for FFSPs. Awards are done as specified in FIS, national or divisional rules. FFSP's are based on the highest score of the event regardless of nationality. Thus if the score in the qualifications is 26.5 and the finals is 26.25 then we will use the score from the qualifications.
5. In FIS mogul events, and the Junior Nationals, FFSP's are calculated using the final scored or as follows:

FIS FFSP Result Adjustment for Moguls

Logic = In moguls where there are a semis and finals system, it is possible that a score from one or more athletes that do not make the finals will be higher than that of a finalist. This happens by virtue of the absoluteness of the final results.

Goal = To create a system that does not disadvantage a finalist or unduly advance a non-finalist in the FFSP system. If the score for the top person in the second run is lower than the score for the final non-qualifier, the first person's score will be changed to 30.

Note: These calculations have no effect on the outcome of awards or the basis of the events 'official' results. These are strictly for the benefit of creating a fair ranking in the FFSP by their achieved event outcome.

Formula and Sample

$(BPS - FNQ) / \# \text{ in ASG} + 1 = AF$

$BPS - AF = AS1 \text{ (Trunc)}, AS1 \text{ (Trunc)} - AF = AS2 \text{ (Trunc)},$

$AS2 \text{ (Trunc)} - AF = AS3 \text{ (Trunc)}, \text{ etc.}$

Where BPS = Break Point Score

FNQ = First Non-Qualifier

ASG = Adjusted Score Group

AF = Adjustment Factor

Sample Event

	Place	Actual Score		Place	Actual Score
	1	25.60	AS2	13	19.54
	2		AS3	14	18.99
	3...		AS4	15	13.79
BPS	11	20.02	AS5	16	12.67
AS1	12	19.86	FNQ	17	19.88

Calculation

$(20.02 \text{ (BPS)} - 19.88 \text{ (FNQ)}) / 6 \text{ (\# in ASG} + 1) = .023333\dots$

Apply adjustment factor to the ASG thusly

$AS1 \text{ (Trunc)} = 20.02 \text{ (BPS)} - .023333333 \text{ (AF)} = 19.99$

$AS2 \text{ (Trunc)} = 19.99 \text{ (AS1 (Trunc))} - .023333333 \text{ (AF)} = 19.97$

$AS3 \text{ (Trunc)} = 19.97 \text{ (AS2 (Trunc))} - .023333333 \text{ (AF)} = 19.95$

$AS4 \text{ (Trunc)} = 19.95 \text{ (AS3 (Trunc))} - .023333333 \text{ (AF)} = 19.92$

$AS5 \text{ (Trunc)} = 19.92 \text{ (AS4 (Trunc))} - .023333333 \text{ (AF)} = 19.90$

FFSP Result Adjustment for Dual Moguls

Formula located at usskiandsnowboard.org.

Halfpipe, Slopestyle and Big Air Event Scoring

The U.S. Freeskiing National Ranking list is based on a “place-points” scale. This simply means that for every scored sanctioned competition, points are awarded from 1st place through last place.

The exact calculation of the points awarded to each finish place is determined by the competition level. Once the competition level has been determined, the curve based point system will be applied.

Competition Levels

Platinum Level - 1000 point scale	Olympics, World Champs, World Cup, Dew Tour
Gold Level - 900 point scale	NorAm’s, Grand Prix, Jr. World Championships
Silver Level - 800 point scale	Revolution Tour, Jr. Nationals, Europa Cups
Bronze Level - 700 point scale	Divisional Events

How U.S. Freeskiing Event Scoring Works

A curve based system with a 650 point range, is used for competition place points for finishes in a given competition e.g. if a meet is valued at 900 points, the floor would be 250 points. First place earns 900 and last place earns 250 regardless of number of competitors. All places between earn an equally representative portion between those values. Likewise, if a meet is valued at 1000 points, the floor would be 350 points. First place earns 1000 and last place earns 350, regardless of number of competitors.

DNS will not count in total for number of competitors. DNF will count in the total

number of competitors. If there is more than one DNF or any ties for last place, all last place competitors will earn the meet floor value.

In order for a competition to receive maximum point value on the Freeskiing National Ranking list it must have 3 starters. If less than 3 athletes start, the event will receive 50% of the maximum point value.

Curve Calculation Example

Meet Value - 700 points

Curve Range - 650 points

Floor - 50 points (as calculated by meet value of 700 minus curve range of 650)

Number of competitors - 36

Meet value separation by place - 18.75 (as calculated by the curve range of 650 divided by the number of competitors in the competition minus one [36-1] to allow last place to land at 50 = 18.57 value separation per place, descending from 1st place).

Table of scores for above example

Place	Score	Place	Score	Place	Score
1	700.00	13	477.14	25	254.29
2	681.43	14	458.57	26	235.71
3	662.86	15	440.00	27	217.14
4	644.29	16	421.43	28	198.57
5	625.71	17	402.86	28	180.00
6	607.14	18	384.29	30	161.43
7	588.57	19	365.71	31	142.86
8	570.00	20	347.14	32	124.29
9	551.43	21	328.57	33	105.71
10	532.86	22	310.00	34	87.14
11	514.29	23	291.43	35	68.57
12	495.71	24	272.86	36	50.00

Skicross Event Scoring

Skicross events use FIS scoring. For information see fis-ski.com.

FREESTYLE AND FREESKIING POINTS LIST CALCULATIONS

To be eligible for points, the athlete must have a current freestyle/freeskiing Competitor membership. Annual membership, including FIS as applicable, must be maintained each year to keep points active.

At the end of each competition period new FFSP's are computed for each qualified competitor. This will re-index the entire field of qualified competitors for the next competition period.

Athletes who do not compete in their divisional championships will not be included on List 4 in moguls and dual moguls except as approved by divisional chairs. A list of athletes who do not meet the requirements will be provided to national staff by the Divisional Chairs.

Points and rankings are only calculated when a list is published; they are not calculated between list periods (see the list schedule earlier in this chapter).

Fall Points

- Carry over points as calculated on the last list from the prior season.
- If competitor does not have points from the last list of the prior season, they will be

assigned zero points for the fall.

List 1 and List 2

Select the highest points from the following scenarios:

MO, DM

- Fall points,
- 2 or more results: best 2 results, fall points may be used as 1 of the results; summed and divided by 2,
- 1 result: if fall points equal zero, use the 1 result. If fall points are greater than zero, sum fall and 1 result and divide by 2,
- No results: use fall points.

AE

- 4 or more jumps: best 4 jumps summed and divided by 4,
- 3 jumps: 3 jumps summed and divided by 4,
- 2 jumps: 2 jumps summed and divided by 4,
- 1 jump: 1 jump divided by 4,
- No jumps: use fall points divided by 2.

HP, SS, BA, SX

- Fall points,
- 1 or more results: best 2 results, with fall points as a result, summed and divided by 2, unless fall points are zero, then result minus 40%,
- No results: use fall points.

List 3

MO

- 3 or more results: best 3 results, fall points may be used as 1 of the results, summed and divided by 3,
- 2 results: 2 results summed, fall points may be used as 1 of the results, and divided by 3,
- 1 result: 1 result, fall points may be used as a result, divided by 3,
- No results: points drop to zero.

DM

- 2 or more results, best 2 results, fall points may be used as 1 of the results, summed and divided by 2,
- 1 result: 1 result, fall points may be used as the result, divided by 2,
- No results: points drop to zero.

AE

- 4 or more jumps: best 4 jumps summed and divided by 4,
- 3 jumps: 3 jumps summed and divided by 4,
- 2 jumps: 2 jumps summed and divided by 4,
- 1 jump: 1 jump divided by 4,
- No jumps: use fall points divided by 4.

HP, SS, BA, SX

- If a competitor has 2 or more results in the current season, the best 2 results are summed and divided by 2. Fall points are not part of this calculation,
- If competitor only has 1 result, points will equal the result minus 40%,
- If a competitor does not have any valid results in the current season, but has valid fall points, then their FSP points are Fall Points minus 80%.

List 4

- Fall points will not be used for MO, DM and AE,
- Athletes remain on the list except those not meeting divisional requirements,
- Competitor must have results in at least 2 of the first 4 scoring periods. The scoring periods are listed earlier in this chapter. If they do not, then the points will drop to zero for that discipline.

MO

- 3 or more results; best 3 results, summed and divided by 3,
- 2 results; 2 results summed, and divided by 3,
- 1 result: 1 result, divided by 3,
- No Result, points drop to zero.

DM

- 2 or more results/scores: best 2 results, summed and divided by 2,
- 1 result/score: 1 result, divided by 2,
- No result: points drop to zero.

AE

- 4 or more jumps: best 4 jumps summed and divided by 4,
- 3 jumps: 3 jumps summed and divided by 4,
- 2 jumps: 2 jumps summed and divided by 4,
- 1 jump: 1 jump divided by 4,
- No jumps: points drop to zero.

HP, SS, BA, SX

- Points are calculated as they were for List 3.

List 5 and List 6

MO, DM, AE

- Fall points will not be used,
- Same calculation as List 4.

HP, SS, BA, SX

- Points are calculated as they were for List 3.

Procedure for athletes injured, sick or unable to attend divisional championships

1. Divisional championships must be set on the schedule before the season begins and named divisional championships.
2. An athlete who is sick, injured or unable to compete in divisional championships must inform their divisional chair at the time of the event. How each division requires notification is up to that division.
3. Divisional chair must notify Katie Fieguth, via email or voice mail, by 5 p.m. MST Mar. 6 if any disciplines have been cancelled or of any athletes that should not be removed from list 4, valid Mar. 9.
4. Once list 4 is run it will not be re-run for individual athletes or divisions that failed to notify national staff of cancelled disciplines. The FFSC Executive Committee will then hear all individual requests.

MOTION IS MEDICINE®

CHAPTER 3

COMPETITION

This section of the Freestyle/Freeskiing Competition Guide provides general information on the major events and series, many of which are invitational or only open to skiers qualifying through previous competitions. For events and series where particular qualifications apply, the entry criteria, field size and design of the programs themselves have been carefully developed. The programs provide the best and most logical programs to encourage involvement of skiers and provide timely opportunities for talented competitors to reach their full athletic potential in freestyle/freeskiing.

Age Class Competition

Each division conducts various types of competitions open to all members. Check your division's schedule of events. You will be competing in your particular age classification only - age classes can be found in chapter 1 of this Guide.

Divisional Affiliation

An athlete must compete for the division in which he or she resides, or in which he or she is attending school and/or training on a long-term basis. The choice (designation) should be based on where the athlete spends the greatest part of his/her ski season. Athletes must declare divisional affiliation at the start of the season and must abide by that declaration for the entire season. Any conflicts must be resolved before participation. No changes will be accepted without the approval of the freestyle program director and the freestyle/freeskiing sport committee chairperson.

Junior Nationals

The Freestyle/Freeskiing Junior Nationals will be held Mar. 6-11, 2018 in Park City, UT. The Junior Nationals brings together the top junior competitors from each division. Junior National results determine who the best overall junior competitor in each discipline: moguls, dual moguls, aerials, big air, slopestyle, halfpipe, freestyle combined, freeskiing combined and the best competitor in each age class. A Divisions cup at Junior Nationals will be awarded using FIS World Cup points system for the aerials, big air, halfpipe, slopestyle, and moguls events.

All athletes must be current Freestyle/Freeskiing Competitor members.

Format

Junior Nationals is run according to national rules, a qualifications/finals format will be used for moguls, halfpipe and slopestyle.

In moguls the jury will determine the finals format during the mogul draw team captions meeting with a minimum of 20 and a maximum of 40 competitors (men and women) will move into finals. Halfpipe and slopestyle format – see section 4603 and 4703. The results from finals will be used for overall and age group awards. The results from finals will also be used for the FFSPs, as explained in chapter 2 of this guide.

FIS FFSP adjustment for moguls and duals. Run order selection for dual moguls will be taken from the junior FFSP List #3 used for Junior Nationals selection. The top 16 athletes will be seeded, but cannot be seeded against athletes ranked 17-32 per FIS normal dual bracketing. Remaining athletes will be randomly seeded.

Quotas and Invitees

The Junior National invitations for all events are chosen from the most recent junior FFSP, List #3 (valid Feb. 23), and in some cases USASA age class rankings at the most recent USASA Nationals. Divisions may not add to or change requirements for the quota spots described in this section with the exception of those spots designated as the divisional allocations. The registration procedure for Junior Nationals will be updated every year at the spring FFSC Congress meetings with the specific dates and with what party will handle registrations.

The registration and invitation procedure for Junior Nationals will be as follows.

1. The Juniors invitation list will be published by Feb. 25, 2018 at usskiandsnowboard.org. Updates will be posted in this same section.
2. From the initial posting and as invitations are updated, invitations MUST be accepted within 48 hours of posting including USASA invitations. Invitations that are NOT accepted will become null and void. For example, invitations posted on Feb. 25 at 12 p.m. MST must be accepted by Feb. 27 at 12 p.m. MST.
3. Once an invitation is accepted (date and time is recorded on invitation website), the athlete must confirm registration by registering online within 48 hours. Athletes that are unable to register within 48 hours must notify the registration contact. Contact information is available online.
4. The invitation updating process will continue online until Mar. 3, 2018 at 12 p.m. MST, at which point the website will freeze with all registration directed to the event organizer when official registration opens.

Criteria

1. Halfpipe, slopestyle and big air events - each division will receive an allocation of 5 spots per discipline, per gender. Divisions must notify the Freestyle office of allocation selections by Feb. 24, 2018.

Halfpipe and slopestyle events - top finishers from each of the following age classes at the most recent USASA Nationals shall be invited to Junior Nationals according to the following quota:

Age Class	Men	Women
10-12 years old	3	3
13-15 years old	3	3
16-18 years old	3	3
Open*	3	3

1 Overall Champion (per age group: 10-12, 13-15, 16-18)

*Athletes who are not eligible for Junior Nationals by virtue of their age are not included in the Open ranking.

Remaining spots for halfpipe, slopestyle and big air will be filled from the junior FFSP, List #3 up to max field size of 80 men and 40 women.

Alternates will be selected from the junior FFSP (List #3), up to the max field size of 80 men and 40 women.

All invitations, including USASA athletes must be accepted within 48 hours of posting.

2. For aerials, dual moguls and moguls the top U.S. athletes from the most recent junior FFSP, List #3, are invited according to the below quotas:

Event	Men	Women
Aerials *	50	50
Dual Moguls	48	48
Moguls	60	60

* Any inverted aerialist who has qualified two inverted jumps but does not qualify for this event then that skier is granted a spot to the Junior National aerial event above the current quota.

* Athletes invited in moguls or dual moguls will be granted starts in both mogul and dual mogul events. Must be ranked on the FSP List #3 in discipline.

Foreign athletes will be allocated 10 spots per gender per discipline above the U.S. athletes quota. A foreign athlete must be ranked in the top 60 FFSP List #3.

3. If an athlete qualifies from the junior FFSP #3 from the initial posting, to compete in 3

or more events at Junior Nationals then they will be considered an all-event skier. An all-event skier may start in all 5 events only if they are ranked on the junior FFSP #3 and will be added above the quotas only in the events in which they have not already qualified. An all-event skier can choose which events to ski. If an all-event skier chooses not to ski in an event that they have not qualified in, an alternate is not placed into the event since these athletes are added above the current quota.

4. If by virtue of criteria #2, and excluding any athletes qualified by virtue of criteria #1, a division does not have three athletes per gender per discipline in aerials, moguls and dual moguls accept their invitation, then the division is guaranteed a maximum of three men and three women. Any spot that remains unused will be lost.
5. Each division may conduct a freestyle combined at its divisional championships. The freestyle combined junior champion will be added to Junior Nationals above the current quota.

A. The Junior National Freeskiing Combined Champion is to be defined by picking an athlete's best event results from each of the three categories (1) big air, (2) slopestyle and (3) halfpipe. Athletes must participate in ALL three categories to be considered for the Junior National Freeskiing Combined Champion title. The Freeskiing Combined Champion from each division will qualify for Junior Nationals above the quota.

B. Junior National Freestyle Combined is to be defined by picking an athletes' best event from each of the three categories: (1) single moguls, (2) slopestyle or halfpipe and (3) aerials or big air. The best of each category is then added to give the combined total. Athletes must participate in ALL three categories. The athlete will qualify from the FFSP List #3 to compete in 3-6 events at their discretion, but must have one event from each of the three categories to be considered for the Junior National Freestyle Combined Champion.

6. Ten athletes per gender in moguls, dual moguls and aerials will be named as alternates to compete in Junior Nationals. These alternates are to be named off the initial posted invitation and will represent the next ten names on the juniors FFSP List #3 per gender, and per discipline. No more than ten alternates will be entered into the event even if greater than ten athletes decline their spots. Alternates must be placed into the event prior to the time of the draw for the event in which they are named as alternates. All alternates must be registered and paid prior to entry into the event.

FIS Junior World Championships

The Junior World Championships may be held annually as determined by the FIS. The size of the quota will vary depending upon the event and will be determined by the FIS. These championships provide a unique opportunity for the best junior freestyle/freeskiing skiers in the world to compete together. The Junior World Championships are important competitions in the development of future World Cup contenders. World Cup skiers are usually found on the official entry list.

Selection Criteria and Age Eligibility

Please visit usskiandsnowboard.org for aerials, moguls and dual moguls criteria. These criteria are listed in order of selection and importance.

Please visit usskiandsnowboard.org for halfpipe, slopestyle, and skicross criteria.

U.S. Selection Events

Selection Events, are used to qualify skiers to earn starts in the U.S. World Cups, and starts in NorAm competitions. The event is being held in December in a location TBD. Athletes invited in moguls or dual moguls will be granted starts in both moguls and dual moguls. This event is a FIS event and will follow FIS age requirements. Development Group athletes must start in all event days. Must have a FIS license in order to compete.

Selection/Quotas

1. All U.S. Freestyle Ski Team A, B, C and D Team.
2. All athletes who competed in the prior season's U.S. Freestyle Championships.
3. All athletes who are ranked in the top 45 in moguls, top 45 in dual moguls and top 30 in aerials, on the final FFSP of the previous season that are not qualified via criteria 1 and 2.
4. All athletes that finished in the top 10 in moguls, top eight in dual moguls and top 10 in aerials in the prior season Junior Nationals that are not qualified via criteria 1, 2 and 3. No alternates will be taken from Junior Nationals.
5. If by virtue of criteria 1, 2, 3 and 4, a division does not have an athlete competing in a discipline in each gender, then that division will be granted a spot in that discipline and that gender to use as it wishes. If the spot remains unused it will then be lost.
6. There will be five alternates per gender per discipline. These alternates are to be named off the final FFSP list of the previous season and will represent the next five names on the FFSP list per gender and per discipline that have not already qualified for the event. Alternates will be placed into the events in the order they are named and will be notified immediately. The alternates will only compete if any of the skiers qualified via criteria 2 and 3, don't accept their spots or get injured.
7. International quotas as outlined by U.S. Ski & Snowboard and FIS.
8. Additional athletes may qualify to compete at the U.S. Selection Events in aerials by having a minimum of two different inverted jumps qualified.

North American Tour (NorAms)

NorAm events are conducted for the top U.S. and Canadian skiers with additional positions left for foreign skiers. Events are conducted at various ski areas, throughout the season, in both Canada and the U.S. Athletes are selected by using results of U.S. Selection Events.

Quotas

	MO/DM		AE		SX		HP/SS/BA	
	W	M	W	M	W	M	W	M
CAN	20	20	14	14	30		30	
USA	20	20	14	14	30		30	
Host	5	5	3	3	*		*	
Other Nations	40		40		20		20	
Totals	130		102		No max field size		No max field size	

* Up to total remaining field size

Halfpipe quotas are open to athletes with a Freestyle/Freeskiing Competitor membership and a valid FIS license.

NorAm Selection

The NorAm selection and invitation process can be found at usskiandsnowboard.org.

Aerials

U.S. Freestyle Ski Team and Development Group athletes will have first priority. The balance of athletes to fill the U.S. quota will be determined from the U.S. Selection Event by adding the place points from all events (two aerial events). The remaining quota spots will be filled by using the most recent FFSP list for each discipline.

Moguls

U.S. Freestyle Ski Team and Development Group athletes will have first priority. The remainder of the moguls/dual moguls NorAm starts will be granted based on the best two single moguls events and best one dual moguls event from U.S. National Championships, Junior World Championships (only if dates conflict with U.S. National Championships) and U.S. Freestyle Selection Events using place points. Foreign athletes will be excluded from the place point tally at both the U.S. National Championships and the U.S. Freestyle Selection Event. (If conflicting) all competitors at the Junior World Championships will be included in the place point tally. If there are not at least two dual moguls events, the best three single moguls events may be used. Ties will be broken by best finish, then second best finish, then third best finish. In the event that a tie still exists, the best finish from the U.S. Selection Event will break the tie and then ties will be broken by the most current FFSP List #5.

Moguls NorAm injury clause

Based on the final NorAm Grand Prix standings for the previous season, any athlete not currently named to the U.S. Freestyle Ski Team ranked in the top 5 on the NorAm Grand Prix standing or has finished in the top 16 in a Mogul or Dual Mogul World Cup from the previous two seasons that is unable to compete in any or all the NorAm qualification events (U.S. Championships, U.S. Selections) due to injury will be guaranteed starts at all NorAm Tours stops for one season. The athlete must provide all medical documentation stating that they are unable to compete. Once medically cleared to compete, they would retain their NorAm start.

U.S. Freestyle Championships – Aerials, Moguls and Dual Moguls

The U.S. Freestyle Championships will be held in the spring of 2018; the dates and location had not been confirmed at press time. This competition combines the U.S. Freestyle Ski Team and the top divisional skiers from around the country in aerials, moguls and dual moguls. Athletes invited in moguls or dual moguls will be granted starts in both moguls and dual moguls events. Divisions may not add to or change requirements for the quota spots described in this section with the exception of those spots designated as the divisional allocations. Divisions must notify the Freestyle office of their allocations 48 hours after FFSP List #4 becomes valid. The Divisions Cup will be awarded at U.S. Freestyle Championships and will include U.S. Team members. This event is a FIS event and will follow FIS age requirements. Must have a FIS license in order to compete.

Quotas

1. All U.S. Freestyle Ski Team A, B, C and D Team.
2. Top 35 ranked U.S. athletes in moguls and dual moguls from the FFSP List #4 per gender per discipline after the U.S. Ski Team.
3. There will be a set number of five (5) alternates per gender per discipline. These alternates are to be named off FFSP List #4 and will represent the next five (5) U.S. names on the FFSP List #4 per gender per discipline that have not already qualified via criteria 2 or 3. Alternates will be placed into the events in the order they are named and will be notified immediately. The alternates will only compete if any of the skiers qualified via criteria 2 and 3, do not accept their spot or get injured.
4. All Athletes that qualified via criteria #2 and #3 must be ranked in the top 60 U.S. Athletes on the FSP list #4 per discipline.
5. Divisions will be allotted one spot per gender, per discipline to be used at the divisions' discretion. A divisionally allocated MO or DM athlete will be allowed to participate in both events (MO, DM), provided that they meet criteria #4 for the non-allocated event. Divisions must notify the Freestyle office of their allocations 48 hours after invitation becomes valid. If the spot remains unused, or divisions do not notify by the 48 hour deadline the spot will

be lost. If division allocation is invited to the event through the alternate list divisions will be allowed to choose a new division allocation.

6. Additional athletes will not be invited to replace those athletes that are not FIS age eligible, excluded by their division, injured or competing in conflicting events. Non FIS age athletes will NOT be passed on main list or alternate list.

Format

1. FIS World Cup rules will be used and can be found on the FIS website, fis-ski.com.
2. One day prior to the draw for each event there will be an entry meeting where the quota's for that event will be analyzed and filled with any alternates giving them due time to be notified, respond, commit, register and arrive.

U.S. Grand Prix

The 2018 Toyota U.S. Grand Prix will feature competitions in Halfpipe and Slopestyle. The 2018 Toyota U.S. Grand Prix will feature the best freeskiers from the U.S. and world competing for a prize purse of over \$550,000. In addition, all Grand Prix events will be televised on NBC and NBC Sports.

Toyota U.S. Grand Prix information can be found at usskiandsnowboard.org.

Eligibility

Athletes must hold a current U.S. Ski & Snowboard Competitor membership and FIS license.

Schedule

Visit usskiandsnowboard.org for current schedules and event information.

Revolution Tour

The U.S. Revolution Tour is a series of events consisting of Halfpipe, Slopestyle, Skicross and Big Air, designed to serve as a stepping-stone for athletes making the transition from competing at the grassroots level to the elite level. The series entry is based on multiple criteria that pre-qualify US athletes into the events. The Revolution Tour is focused towards skiers 14-19 years old and awards the top juniors an invite to compete in the U.S. Grand Prix, Junior Worlds, USASA Nationals, and participate in Project Gold camps.

Competition formats may vary slightly at each stop, but skiers will always compete as an open class, and unless otherwise stated, athletes under the age of 14 are not eligible to compete. Athletes must hold a current U.S. Ski & Snowboard Freeskiing Competitor membership and FIS license.

Visit usskiandsnowboard.org for current schedules and event information.

Hole Shot Tour

The Hole Shot Tour is a series of skicross events designed as a stepping-stone for athletes making the transition from competing at the grassroots level to the World Cup level. The series will be open to any athlete, but is focused towards skiers 16-20 and will award the top junior an invite to be a part of U.S. Freeskiing Project Gold.

Athletes must hold a current Freeskiing Competitor membership and FIS license.

Schedule

Visit usskiandsnowboard.org for current schedules and event information.

Europa Cup and FIS Competitions Criteria

The following criteria will be used to determine athletes eligible to enter Europa Cup or FIS competitions up to the allowable quotas. Qualified athletes interested in participating must contact the Freestyle/Freeskiing office at least three weeks prior to the event(s) in which they are interested.

1. Current U.S. Freestyle Ski Team: A, B or C Team members in aerials, moguls, or dual moguls.
 - A. Ties will be broken by:
 - 1) Team status
 - 2) FFSP ranking
2. Development Group: By rank from the U.S. Selection Events.
3. Athletes selected by coaches' discretion.

U.S. Freestyle Ski Team and World Cup Criteria

Team and World Cup criteria can be found at usskiandsnowboard.org.

U.S. Freeskiing Team and World Cup Criteria

Team and World Cup criteria can be found at usskiandsnowboard.org.

Elite Aerial Development Program (EADP)

The EADP is a high level national Aerial development program based in Lake Placid, NY at one of three Olympic Training Centers in the United States. Program is limited to twelve residential athletes. Education is in collaboration with TEAM Academy. More information on this program can be found at usskiandsnowboard.org.

Freestyle NorAm Start Group

After the U.S. Freestyle Ski Team is named in May 2017, based on the final NorAm Grand Prix standings for the 2016-2017 season, any athlete not currently named to the U.S. Freestyle Ski Team ranked in the top 5 on the NorAm Grand Prix Standing will be named to the Freestyle NorAm Start Group. This will guarantee these athletes' starts on the NorAm Tour. Freestyle NorAm Start Group athletes must participate in all event days at the U.S. Selections Events. If an athlete is injured and unable to compete in U.S. Selections Events, the athlete must provide all medical documentation stating that they are unable to compete. Once medically cleared to compete, they would retain their NorAm start. An athlete who is named to the group has until June 1, 2018 to accept their spot in the Freestyle NorAm Start Group. Once the national office has been notified that an athlete is retiring or the deadline has passed with no acceptance, the next athlete on the NorAm Grand Prix standings in moguls/dual moguls will be added to the freestyle development group (NorAm Start Group).

Young Guns Moguls Program

These programs are stepping stones to the Moguls NorAm Start Group. For more information and criteria on either program see usskiandsnowboard.org.

Project Gold Freeskiing Development Program

This development program is for halfpipe, slopestyle and ski cross athletes. For more information on these programs please visit usskiandsnowboard.org.

3000 ORGANIZATION

3010 The Organizing Committee

If the organizing club or national association does not act as the organizing committee it will designate one. The organizing committee will appoint a committee for all non-technical matters and a competition committee for all technical matters.

3012 Hosting Duties of the Organizing Committee

3012.1 The organizing committee must assume all responsibility to ensure that the details involved in hosting a U.S. Ski & Snowboard sanctioned competition are properly controlled. The importance of efficient communications with all individuals and participating associations is essential to a well-planned competition.

3012.2 The organizing committee should provide a service to all participants and guests which provides information and materials on accommodation and travel details. This information should be circulated at least three months in advance to ensure availability.

3012.3 The organizing committee is responsible for providing results by email to the national office as soon as they are available. It is also the responsibility of the organizing committee to distribute results to competitors and coaches as soon as they are available.

3013 Basic Costs of the Organizing Committee

3013.1 The organizing committee must pay the event fees and head taxes according to existing regulations.

3013.2 The organizing committee must compensate the judges according to the current policy of the division.

3013.2.1 The event organizer must be responsible for all judges travel expenses for all national level competitions.

3013.3 The organizing committee must compensate the TD according to the current policy of the division or in the case of a national caliber event, the current policy of the Freestyle or Freeskiing subcommittee for rules and officials as stated at usskiandsnowboard.org.

3013.4 The organizing committee must provide accommodations in accordance with the divisions' rules and in the case of a national caliber event the current policies of the Freestyle or Freeskiing Sport Committee.

3013.5 The organizing committee must provide lift tickets for training and competition in accordance with the current policies of the division and or the Freestyle or Freeskiing Committee.

3020 The Competition Committee and Competition Officials

3020.1 The Competition Committee

The competition committee, appointed by the organizing committee, is composed of the following competition officials:

- Chief of Competition
- Chief of Timing
- Competition Secretary
- Chief of Medical and Rescue Services
- Chief of Press
- Chief of Course
- Chief of Scoring
- Chief Steward
- Chief of Course Equipment
- Chief of Sound

The competition committee is responsible for all technical matters, including the selection and preparation of the courses.

The competition committee appoints all additional officials not already designated by the organizing committee.

- 3020.2 Competition Officials
The organizing committee appoints the following officials. The most important officials and their duties are set forth below:
- 3020.2.1 The Chief of Competition
The chief of competition directs and controls the work of all officials, summons the meetings of the competition committee for consideration on technical questions and generally acts as chair of the team captains' meetings, after consultation with the TD. The chief of competition is also a member of the jury.
The division chair approves the divisional chief of competition.
- 3020.2.2 The Chief of Course
The chief of course is responsible for the preparation of the courses in accordance with the decisions of the competition committee and the jury. He must be familiar with the local snow conditions and the terrain concerned.
- 3020.2.3 The Chief of Timing
The chief of timing is responsible for the coordination of officials at the start and finish, including timing equipment. The following officials are under his direction:
- Starter
 - Assistant Starter
 - Chief Timekeeper
 - Assistant Timekeeper
- 3020.2.4 The Chief of Scoring
The chief of scoring is responsible for the ongoing verification of all scoring calculations during the event.
- 3020.2.5 The Competition Secretary
The competition secretary is responsible for all secretarial work related to the competition. He must ensure that the official results contain the information required by 3045.2.2 He is responsible for the minutes of the competition committee, jury and team captains' meetings. He must ensure that all forms for start, judging, timing, calculation and protests are properly prepared and delivered in good order at the proper time. He must ensure that results are duplicated and distributed properly immediately following the competition.
- 3020.2.6 The Chief Steward
The chief steward is responsible for extensive safety precautions to ensure that spectators are kept off all parts of the course. Sufficient personnel must be used according to an exact plan. Ropes or fences should be erected in due time. There should be sufficient spare space behind these barriers to permit free circulation of the spectators.
- 3020.2.7 The Chief of Medical and Rescue Services
The chief of medical and rescue services is responsible for organizing adequate first aid and medical services during the official training periods and the actual competition. For all sanctioned events, ski patrol must be available through immediate access, whether on site or by phone or radio. At all sanctioned aerial events and U.S. Freestyle Championships (all disciplines) ski patrol must be on site for all competitions and aerial training.
He must note the advice of the chief of course concerning special danger points, take the necessary precautions, and must arrange for quarters to which injured competitors may be taken and treated.
He shall ensure that the competition doctor meets with the team doctors before the start of the official training to coordinate plans.
- 3020.2.8 The Chief of Course Equipment
The chief of course equipment is responsible for the provision of all equipment

required for the preparation and maintenance of the courses.

3020.2.9 The Chief of Press

The chief of press is responsible for all arrangements for journalists, photographers, television and radio reporters.

3020.2.10 The Chief of Sound

The chief of sound is responsible for all equipment and operation of sound installations.

3030 The Technical Delegate

3030.1 Appointment

For all national level competitions, the chair of the Freestyle Sport Committee shall appoint the TD after consultation with the chair of the rules & technical subcommittee. For division competitions the TD shall be nominated by the chair of the divisional rules and technical committee to be appointed by the divisional chair. In the case of a national level competition, the appointments must be decided 60 days before each competition and made known to the assigned TD and the organizing committee of the competition.

3030.2 Technical Delegate Qualifications

3030.2.1 A TD may not be a member of the organizing committee, except at the divisional level.

3030.3 Replacement of the Technical Delegate

For national level events, where a replacement is made, a full report must be made and forwarded to national sport staff, the Freestyle or Freeskiing Sport Committee, the chair of the subcommittee for rules and technical, and the organizing committee of the event concerned.

3030.3.1 Before the Competition

For National Level Events

The Freestyle or Freeskiing Sport Committee chair will appoint a replacement after consulting with the chair of the Rules and Technical Subcommittee.

For Divisional Level Events

The division chair will appoint a replacement after consultation with the chair of the division's rules and technical committee.

3030.3.2 During the Competition

For National Level Events

The Freestyle Sport Committee chair should be contacted for a decision regarding replacement. If the chair cannot be contacted, the chair of the rules and technical subcommittee or a member of the freestyle/freeskiing sport committee should make the decision.

3030.4 Duties of the Technical Delegate in the Jury

3030.4.1 The Technical Delegate acts as technical consultant and chair of the jury. Veto rights of the TD in the jury can only be used in extreme situations, some of which are outlined hereafter. In such a case, a detailed report must be sent and circulated to all parties in accordance with 3030.7.

3030.4.2 If the competitors are subject to dangerous conditions, the TD must exercise his right to interrupt or cancel the official training or the competition. This may be done without consultation of the jury.

3030.4.3 If the safety of a competitor is in danger because they lack the physical and/or technical abilities demanded by the course, the TD has the right, pending approval of the jury, to remove the competitor from the competition. The competitor receives a DNS.

- 3030.4.4 If the safety of a competitor is in danger because they lack the ability to complete certain aerial maneuvers, the TD has the right to suspend, reduce, or withdraw those qualifications, subject to agreement by the Jury.
- 3030.4.5 If the safety of a competitor is in danger due to injury, the TD has the right, pending approval from the jury, to remove the competitor from competition. The competitor receives a DNS.
- 3030.5 Duties of the Technical Delegate before the competition
- 3030.5.1 The TD must inspect official and reserve courses just prior to the start of official training.
- 3030.5.2 The inspection should cover the following:
- The technical data of the courses in accordance with Freestyle/Freeskiing technical specifications (see appendix later in this Guide).
 - Proper preparation of the terrain of all courses and arrangements for all safety measures (width of courses, etc.) in accordance with 4002, 4102, 4302, 4502, 4602, and 4202 and in the Freestyle/Freeskiing technical specifications.
 - Influence of the weather on the courses.
 - Choice and preparation of the start and finish areas for the different courses (see rules 3043 -3044).
 - Means of transporting the competitors to the start.
 - Communications between start and finish.
 - Medical service during and after the competitions.
- 3030.5.3 It is the duty of the TD to be ready and willing to advise the organizers, when necessary.
- 3030.5.4 The organizers must keep the TD informed of the progress of technical preparations. The contact between the organizers and the TD is useful and should be continuous.
- 3030.5.5 For national level events, the TD must arrive at the location of the competition at least 24 hours before the beginning of the official training.
- 3030.5.6 He must read the report of the TD of the preceding competition.
- 3030.5.7 For national level events, the TD must check to see that the proposals of the freestyle/freeskiing sport committee or the homologation inspector have been carried out.
- 3030.5.8 The TD is responsible for the review of the TD reports from previous national level events on the same site, as well as the competition immediately preceding it.
- 3030.5.9 The TD will review the list, furnished by the organizing committee, of supplies and service personnel.
- 3030.6 Duties of the Technical Delegate during Training and Competition
- 3030.6.1 The TD is responsible for observation of the training, as well as of the work of the organizing committee, and the competition officials.
- 3030.6.2 The TD must attend all meetings of the jury and the team captains' meeting; he is chair of the jury.
- 3030.6.3 The TD is responsible for the supervision of the technical and administrative conduct of the entire competition.
- 3030.6.4 The TD must advise the organizers on compliance with the rules, as well as decisions on questions, which may not be covered by the rules.
- 3030.6.5 The TD is responsible for collaboration with the team captains and trainers.
- 3030.6.6 The TD must be present at all times during competition.
- 3030.6.7 The TD is responsible for the co-verification of the official results as outlined in rule 3045.2.

- 3030.6.8 The TD is responsible for the training of TD candidates assigned to him during their appointment.
- 3030.6.9 The TD is responsible for controlling discussion between the judges during competition. All discussion between judges is prohibited with the exception of discussion directly with the head judge, except for half pipe and slopestyle where discussion is encouraged.
- 3030.6.10 The TD is responsible for ensuring that the proper standards are implemented for judges' stands (i.e. partitions, heating, and washroom facilities) as they apply.
- 3030.7 Duties of the Technical Delegate after the Competition
- 3030.7.1 Submission of a final report must be sent to the national office, the rules and technical subcommittee chair, and the organizing committee. In the case of divisional competitions reports must be submitted with scores to the national office, the organizing committee, and the division's representative for rules and technical.
- 3030.7.2 As applicable, the TD will make a report on the TD candidates' technical abilities. This report must be sent to the freestyle/freeskiing subcommittee for rules and technical and the responsible person in the candidates' national association.
- 3030.7.3 The TD's report must be submitted to the national office with the submission of the event results.
- 3030.8 Rights of the Technical Delegate
- 3030.8.1 The chair of the jury has the deciding vote in case of a tie (including his vote).
- 3030.8.2 Decisions will be made according to rule 3030.5.
- 3030.8.3 If necessary, the TD will appoint qualified people as members of the jury.
- 3030.8.4 All officials of freestyle/freeskiing events, who are current members in good standing, are covered under the existing liability policy carried when performing duties in conjunction with a specific sanctioned event. Each individual, whether an athlete or official, must carry his/her own medical coverage as U.S. Ski & Snowboard is not responsible for providing such coverage.
- 3030.8.5 Reimbursement of travel expenses and all costs arising out of his duties at the inspections and competitions, as per the current policy of the freestyle/freeskiing subcommittee for rules and officials, or the division.
- 3030.8.6 Complete briefing by the organizing committee through punctual dispatch of all documents on the conduct of the events, such as the official invitation, program, bulletins, etc., as well as immediate information concerning the cancellation or postponement of an event.
- 3030.8.7 The TD has the right to request the support of the organizing committee and its officials in all matters concerning the fulfillment of his duties.
- 3030.9 Candidate Technical Delegates (Assistant TD)
- 3030.9.1 For national level events, the sport director has the right to name additional people, per the rules and regulations of the freestyle/freeskiing subcommittee for rules and technical.
- 3030.9.2 For national level events, the assignment of the TD candidates is the responsibility of the freestyle/freeskiing subcommittee for rules and technical.
- 3030.9.3 For national level events, the cost for food and lodging shall not be borne by the host organizing committee. Transportation is the responsibility of the TD candidate himself.
- 3030.9.4 The TD candidate has to make a report on the event in question which must be sent to the national office, and the freestyle/freeskiing subcommittee for rules and technical.

3032 The Competition Jury

3032.1 Composition

The Jury consists of the following members:

- Technical Delegate (Chair)
- Head Judge or Referee (skicross)
- Chief of Competition

Members of the jury, in decision making situations, each have one vote with the chair having the deciding vote.

A competitor's safety committee will also have input to the jury but will not have a vote (see rule 3034).

3032.2 Duties of the Jury before competition

3032.2.1 A member of the jury is responsible for the qualification of competitors and the supervision of the draw.

3032.2.2 The jury is responsible for the supervision of official training.

3032.2.3 The jury must inspect the courses prior to the beginning of official training and ensure that they conform to all specifications and characteristics outlined in 4002, 4102, 4202, 4502, 4602, and 4702 and in the Freestyle/Freeskiing technical specifications (see appendix later in this Guide).

3032.2.4 The jury is to have its first meeting before the beginning of the official training.

3032.3 Rights and Duties of the Jury during a Competition

3032.3.1 The three voting members of the jury must be positioned on the course at all times and be in communication with one another.

3032.3.2 Jury has the right to change, interrupt, or postpone a competition.

Causes:

- Insufficient, inadequate snow and or course preparation;
- Insufficient protective measures at danger points;
- Deficient or insufficient organization of the medical, rescue and first aid service;
- Insufficient organization of crowd control;
- Weather conditions, increasing danger or extreme cold.

The decision to interrupt a competition may be final or temporary. (See rule 3060.2)

3032.3.3 The jury examines, evaluates, and makes the necessary decision on protests.

3032.3.4 The jury has the right to grant a provisional rerun.

3032.3.5 Written minutes are to be kept of all meetings and decisions of the jury.

3032.3.6 A member of the jury should periodically inspect the course during the competition.

3033 The Judges

3033.1 The judges for a competition will be a group of qualified individuals. For all sanctioned Freestyle/Freeskiing competitions, the judges must be members of U.S. Ski & Snowboard. For national competitions, the panel of judges will be appointed by the subcommittee for judging. For divisional events the head judge is nominated by the divisional judges committee and approved by the division chair.

3033.2 At any national level event, the judges should be, to the extent possible, representative of each of the active freestyle/freeskiing divisions.

3033.3 For national level competitions, the head judge will be appointed by the freestyle/freeskiing subcommittee for judging.

3033.3.1 For divisional competition the head judge will be nominated by the divisional judges committee and approved by the division chair.

3033.4 An alternate for the head judge and for a member of the judges panel should be named and available if for any reason an individual is unable to perform his duties.

- 3033.5 The Rights and Duties of the Head Judge
- 3033.5.1 The head judge is a member of the jury.
- 3033.5.2 The head judge is preferably a non-judging member of the judging panel, responsible for checking the accuracy of the judges decisions, checking the results with the chief of calculation, and policing the judges stand.
- 3033.5.3 The head judge may act as a substitute judge in emergencies.
- 3033.5.4 For national level events, the head judge must ensure that all arrangements for transportation, accommodation, and expenses are organized for each judge. The responsibility for all communications, scheduling, timetables, materials, clinics, attendance, and any detail concerning the judges rests with the head judge. Thus, the head judge must accept all responsibility for any irregularity in the service provided by the judges to the competition.
- 3033.6 Judging Procedures
- 3033.6.1 Each judge will use score cards which indicate who the judge is and the name and bib number of the competitor. All score cards will indicate a score for each category utilized to assign a final score.
- 3033.6.2 Moguls and aerials judges will be separated on the judges stand by a minimum of one meter and a partition, if practical. There will be no discussion between the judges concerning the competitors' scores (except by the head judge).
- 3033.6.3 No competitor or spectator will be allowed to approach the judges stand and talk to the judges during competition.
- 3033.6.4 The jury must deal with any problems or disputes arising from the judges or with the judging. The jury may refer any problem that it cannot resolve to the freestyle/freeskiing sport committee (FSC). The FSC will seek the assistance of the freestyle/freeskiing subcommittee for judging to resolve the problems. Problems within divisions should be dealt with on a divisional basis except where the implications are of national concern.
- 3033.6.5 Judges review committee: Any incident of misconduct by a judge may be reported to the chair of the judges subcommittee by means of a written, signed statement. The judges review committee will, pursuant to paragraph 9.3 of the freestyle/freeskiing judges' constitution, investigate the allegations and, if warranted, take appropriate disciplinary action

3034 Competitor Committees

- 3034.1 The Competitor Advisory Committee
- 3034.1.1 For each event in every competition there shall be an advisory committee formed prior to the start of competition to advise the jury on matters concerning safety. This committee shall consist of:
- One representative from the area management (chief of course);
 - Two athlete or coaches' representatives. For national level events, these representatives must be from two different divisions.
- There will be a separate advisory committee named for each event (men and women).
- 3034.1.2 The members of the advisory committee report in an advisory manner directly to the jury and are non-voting members of the jury.
- 3034.1.3 It will be the advisory committee's responsibility to ensure the arrangements made for the safe operation of all events during the preparation and competition. The advisory committee shall exercise control over all aspects of the event pertaining to safety, and shall in the use of its power of discretion, consciously take all reasonable precautions against excessive and unreasonable risks.

- 3034.2 Jump and Air Bump Shapers
- 3034.2.1 For the express purpose of shaping and grooming the jumps in aerials and the air bumps in moguls and dual moguls, the team captains shall elect up to two shapers per special type of jump (i.e., floater, large kickers, small kickers). These individuals will be responsible for the final preparation of the jumps. In competitions other than Junior Nationals, alternate jump preparation arrangements can be determined at the team captains' meeting.
- 3034.2.2 These individuals must be prepared to perform this task prior to official training.

3035 Team Captains

For national level events, each division or team is responsible for providing one team captain. If possible, the team captain should not be a competitor.

A team captain cannot undertake any other official organizing function (jury, TD, etc.) at the competition.

- 3035.1 Rights of a Team Captain
- 3035.1.1 To submit protests to the jury during the competition.
- 3035.1.2 To benefit from all advantages accorded to a competitor (lifts, accommodations, invitations, etc.).
- 3035.1.3 To enter into competition areas during training time.
- 3035.1.4 To enter all official ceremonies.
- 3035.1.5 Each team captain has one vote. Each division and national team is entitled to one vote.
- 3035.1.6 To enter the preparation area during the competition.
- 3035.2 Duties of a Team Captain
- 3035.2.1 To attend all team captains' meetings.
- 3035.2.2 To provide all information received at meetings to his team members.
- 3035.2.3 To provide aerial qualifications of his team members if requested by the Jury.
- 3035.2.4 Responsible for all registrations of his team.
- 3035.2.5 Responsible for the discipline of his team.
- 3035.2.6 Should be familiar with the competition rules.

3036 Competitor's Equipment

- 3036.1 Bibs
- The shape and size of start numbers may not be changed by penalty of disqualification. All bibs must be worn in the proper position and visible at all times during official training, competition, and awards.
- 3036.2 Advertising
- The advertising on material and equipment which is worn during competitions and training must conform to the FIS guidelines in rules 210, 211, and 230.
- 3036.3 Gimmicks
- Gimmicks are forbidden during competition.
- 3036.4 Equipment
- Rules concerning competitor's equipment are all located here and no longer in the specific event sections.
- 3036.4.1 Competitors must wear a helmet in all freestyle/freeskiing events when skiing in practice or competition. Helmets manufactured for snow sports are required for all competitors in all freestyle/freeskiing competition and official training, for all age categories. Helmets must meet the standard of AST 2040 or CE 1077 rated helmets. Caution: The protective quality of all safety helmets are affected by age and use. Some older helmets and any helmets that have been damaged either in a

fall or from impact may no longer provide sufficient protection – even if there are no visible indications of damage. The helmet must be worn in the manner intended by the manufacture.

All officials and coaches acknowledge the Concussion Management Policy Statement and agree to apply it as necessary. Anyone who registers, athlete or official, is required to sign the new Concussion Management Statement; therefore, this acknowledges everyone's responsibility with this new policy.

3036.4.2 There shall be no minimum or maximum restrictions on ski lengths.

3036.4.3 All competitors in all events shall use a recognized release DIN binding system and devices to prevent runaway ski(s). Runaway straps are not allowed.

3036.4.4 Competitors should be prepared to wear goggles as necessary.

3038 Medical and Service Personnel

Following, are quotas for the right of access to the competition areas. This applies to FIS events. Medical personnel should be allowed without restrictions of a quota:

- Up to 3 competitors: 1 trainer, 1 doctor, 1 technician.
- 4 to 8 competitors: 2 trainers, 1 doctor, 2 technicians.
- 9 or more competitors: 3 trainers, 2 doctors, 3 technicians.

3041 Technical Installations

3041.1 Communications

For all national level competitions there must be direct communication (telephone or radio, etc.) between the start, judges stand and in the case of moguls, the finish. It is suggested that this rule apply at the divisional level as well.

3041.2 Timing Equipment

3041.2.1 Electric Timing

For all sanctioned competitions, electric timing with communications between start and finish must be used, which will allow measurement of the times to 100th of a second. Even when measured and recorded, 1,000th of a second may not be published or used in the event of competitors being tied in the 1/100 second.

3041.2.2 The photo electric cells will be placed at a height of 1 m on the starting light beam. The finish beam on the moguls and dual moguls course should be at 1 m high and the auxiliary beam at .75 m.

3041.3 Hand Timing

3041.3.1 A hand timing system must be used at all times during a moguls or dual moguls event as backup to the electric timing system. For all competitions the hand timing must be totally separate and independent of the electronic timing at the start and finish.

3041.3.2 In the event of failure of the electric timing system the official hand time shall be calculated in the following way: The hand time takes the average difference between the official electric time and the hand time for the three runs prior to the missed electric time. If there were not three electric times prior to the missed time then the closest three times to the electric time missed shall be used.

3041.4 Public Address System

3041.4.1 Music is used in all events. The sound system must be powerful enough for the competitor to hear the music clearly and without distortion while on any part of the course. The speakers must be on the side(s) of the course, and evenly distributed from top to bottom, in order for the sound to reach the competitor simultaneously on the course.

3041.4.2 The chief of sound will be in radio contact with the competition officials at all times.

3041.4.3 A minimum of two amplifiers should be available during the competition.

3041.4.4 The chief of sound is responsible for stock music during the competition.

3041.4.6 Moguls

During the moguls event, stock music will be used and at the option of the organizers, the competitor's music can be used for this event. The music should be upbeat and energetic.

3041.4.7 Aerials and Halfpipe

Stock music will also be used during the aerial and halfpipe event. A variety of exciting music is recommended.

3041.5 Judges' Stand

The minimum size of the scaffolding area must be 8 m by 2 m. The judges viewing area should be constructed to provide ample room for the appropriate number of officials and to provide room for viewing, storage of equipment and all proper amenities for the operation of the competition.

3042 Start and Finish Officials

3042.1 The Starter

The starter is responsible for the warning signals and start command. He is responsible for start recording. He assigns the supervision of the competitors to the assistant starter.

3042.2 The Assistant Starter

The assistant starter is responsible for checking competitor's bibs, clothing and equipment for violations. He must call competitors several times during the ten minutes before each run.

3042.3 The Chief Time Keeper

The chief time keeper is responsible for the accuracy of the timing. The times must be made available to the competition secretary for immediate publication. He is also responsible for recording of data. He may select an assistant if he wishes. He is responsible for the organization and layout of the finish area, including the proper crossing of the finish line by the competitors.

3042.4 The Finish Official

The finish official in the moguls event is responsible for checking that all jumps are landed in the course (a jump is landed in the course if the center of the skis [boots] are on the ground before the skier crosses the line). In halfpipe the finish line is the last point of takeoff, this means if you takeoff and perform a trick on or before the line, the trick and fall will be counted. The finish official assists the judges with DNF rulings.

3043 The Start

3043.1 The start shall be prepared in such a way that the competitors can stand relaxed in the starting area.

3043.1.1 The aerial start is anywhere on the course, but cannot exceed the maximum start line as established for safety reasons.

3043.1.2 The moguls start will preferably be an open start with a light beam installed approximately 1.5 m - 2.0 m down, across the hill, parallel to the starting line. The starting line and the light beam will be as wide as the control gates on the top of the course. The competitor should plant his/her poles in front of the line and his/her boots should stay behind the line until the starting signal is given.

The moguls start can also consist of one or more traditional starting gates with the electric timing device attached. The starting gate will be located where the competitor has easy access to his/her skiing line and can quickly reach full speed

after leaving the start.

3043.2 The Start Area

The start area must be closed off to everyone except the starting competitor, accompanied by only one trainer and the start officials. A special roped off area must be provided for trainers, team captains, service personnel, etc., in which they may take care of the waiting competitors without being interrupted by the public.

3043.2.1 A tent must be provided at the start area. If the temperature could be below -10 Celsius, a heater must also be provided.

3043.3 Start Procedure

No official or attendant who could possibly give an advantage to, or disturb the starting competitor may be behind him. All outside help is forbidden.

3043.4 Start signals specific for each event will be given by the starter.

3043.4.2 The aerial start signals will begin with the starter confirming that the jump is clear and by then informing the competitor to proceed. The competitor then has 15 seconds in which to start.

3043.4.3 The moguls start signals begin with a warning ten seconds before the start. Five seconds before the start a start command will then be given "Competitor ready!... 3, 2, 1, go"

3043.4.3.1 In dual moguls if a competitor is unable to start for any reason, the other competitor in that round cannot ski the course.

3043.4.3.2 The Dual Mogul start command shall begin with a warning from the starter: "Blue Course Ready,... Red Course Ready!" The Starter or gate opener shall open both gates simultaneously within 3 seconds of this announcement. Should the gates fail to open for any reason, this procedure shall recommence.

3043.5 Start Timing

In the moguls event, the start timing shall begin at the exact time the competitor crosses the light beam or when he/she opens the start gate with his/her leg below the knee.

3043.6 Delayed Start

A competitor who is not ready to start in the position indicated on the official start list will receive a DNS. The starter may, however, excuse such a delay if, in his opinion, it is due to "force majeure" or the competitor can prove that he is having equipment problems. He may run at a later time as determined by the starter. In case of doubt, the starter may allow a start provisionally, but must inform the jury.

3043.6.1 In the case where a start has been delayed and the competitor is ready to go, the Starter will run the competitor at the first start opportunity, as approved by the Jury.

3043.7 The Start Order

The start order is determined at the team captains' meeting on the day before the event. A random draw done by computer may be used at all freestyle/freeskiing competitions.

3043.7.1 Each event shall have a separate start order. The start order for each event shall be different. If a final, semifinal format is used, the start order for finals shall be the reverse order of the finish of semifinals. If there is a tie after the semifinals, a method of chance shall be used to determine the start order for finals. The winner shall take precedence in the start order.

If a competitor is improperly placed or omitted from a start list due to an error by a team leader or coach, that competitor will be added to the start list in the first position.

If an error in the start order is made by the organizing committee, the draw must

be remade. In this case the team leader or coach must inform the organizing committee of the error within 15 minutes from the distribution of the start list. After 15 minutes the error will be treated as an error by the team leader or coach, except in the case of dual moguls where no changes will be permitted after the draw.

3043.7.2 Start Groups

Does not apply to sanctioned competitions.

An approved substitute for a competitor can be inserted into the running order, for either run, at any time up to the original competitor's scheduled start, however, two different skiers may not be allowed one run each.

3043.7.3 No changes, additions or substitutions shall be permitted to the dual moguls start list once drawn.

3043.7.4 The start order will include the following information:

- Name of competition sponsor;
- Name of competition;
- Site of competition;
- Dates;
- Times;
- Name, division affiliation, ski club and bib number of competitors;
- Section of national ski association and/or FIS;
- Names of jury and judges;
- Mean course standards.

3043.7.5 The start order must be circulated to all officials, coaches, competitors, television and media personnel, and VIPs.

3044 The Finish

3044.1 The Finish Area

3044.1.2 The finish area for the aerial event must be satisfactorily large enough to allow the competitor to stop safely (see appendix later in this Guide). Safety fences and barriers must be in place.

3044.1.3 The finish area for the mogul and skicross events must be a smooth area equal to the width of the course, for at least 30 m from the finish line. The finish line will be 8-10 m wide. The area, 3 m for moguls and 10 m for skicross before the timing light, must be smooth in order for the competitor to ski through the electric timing eye.

3044.1.4 The finish area is to be completely fenced in and constructed in a way as to not allow high speed exits. Any unauthorized entry must be prevented. The necessary protective barricades shall be placed so as not to interfere with the competitors skiing. For competitors who have finished their runs, a special area, separated from the actual finish area, is to be provided. In that area, contact with the press (written and audio/visual) shall be made possible.

Air fence or other appropriate safety structures shall be used to prevent any possibility of a collision with the finish structures.

3044.1.5 Determination of Finish

With electric timing, the time is taken when a competitor crosses the line between the finishing posts with any part of his body or equipment, and so breaks the contact.

3044.1.6 Failure of Electronic Timing

In the event of a failure in the electronic timing system, the hand recorded times will be the ones to constitute the official time of the run. Hand timing will be used as back up for the entire round of competition.

3044.1.6.1 If all the timing fails during a competitor's run, the competitor may receive a rerun.

3044.1.6.2 In the event of a timing failure, every effort should be made to procure an accurate time, i.e., backup hand timing or possibly video.

3045 Calculation and Announcement of Results

3045.1 Unofficial Scores

Scores taken by the chief of scoring shall be considered unofficial scores. Whenever possible, unofficial scores should be announced to the public with their provisional status clearly indicated.

3045.2 Official Results

3045.2.1 Official results are determined from the scores of those competitors who have not been disqualified.

3045.2.2 The official results must contain the following information:

- Name of competition sponsor;
- Name of competition;
- Site of competition;
- Date and time of competition;
- Name and division affiliation of jury and judges;
- Name and division affiliation of chief of course;
- Mean course standards;
- Name of organization, club or association;
- Competitor names, division affiliation, bib numbers;
- Complete scoring calculations (i.e. individual judges scores, degree of difficulty factors, speed and speed points);
- Sanction of national ski association and/or FIS.

The official results are made official following an inspection by both the chief of scoring, TD and the head judge, and by the application of their signatures.

3045.2.3 Results for both the first and second runs must be published.

3045.2.4 There can never be any award ceremony before the end of an event.

3045.3 Calculation of Scores

Calculation of scores shall be generally determined as follows:

3045.3.1 All published numbers must be truncated to two places after the decimal point.

3045.3.2 All competitions must have 5 or 7 scoring judges except in divisional events where a three judge format is acceptable.

3045.3.5 The total score determines the winner. This system is affected by specific variations in scoring procedures in each discipline as outlined in aerials 6004, moguls 6204, dual moguls 6304, and halfpipe, slopestyle and big air 6600.

3045.4 Tie Breaking

Tie breaking is performed by the chief of scoring or head judge.

3045.4.1 Ties in each event shall be broken using the tie breaking procedure defined for that event. Refer to Judging Manual sections 6009, 6204.5 6009, 6204.5, 6304.2.1.1, 6304.2.1.2 and 4505.2.2 and 4505.2.3. If the tie cannot be broken, all tied competitors shall will receive the better place and the following place will be unused.

Example:

13th place - 28.6 point

14th place - 26.0 point

- 14th place - 26.0 points
- 16th place - 24.2 points
- 17th place - 24.0 points
- HP/SS/BA tie breaking refer to 6600.

3045.4.2 In the event of an unbreakable tie between the qualifiers for the next round, the start order for tied competitors shall be the reverse of their Qualifications start order. If a tie exists for the last place on the start list for any round of a competition after all tie-breaking procedures for that event have been exhausted, all tied competitors shall go forward to that round.

3045.5 Publication of Judges Scores

When judges scores are published, care must be given to show the category each judge is scoring before showing his nationality. This is especially important when scores are inserted in television pictures.

Judge	1	2	3	4	5	6	7
	A/F	A/F	A/F	A/F	A/F	L	L
	6.6	6.5	6.8	7.0	7.0	2.1	2.0

3046 Age Categories

3046.1 Age categories can be found in chapter 1 of this Guide.

3046.1.1 Non-scored competitions may present awards for each birth year.

3046.2 Competition Year

3046.2.1 The Freestyle (AE, MO, DM) competition year is from April 1 until March 30.

3046.2.2 The Freeskiing (HP, BA, SS, SX) competition year is from July 1 until June 30.

3046.2.3 The membership year is from July 1 until June 30.

3047 Freestyle/Freeskiing Points (FFSP)

Refer to the “Freestyle/Freeskiing Point System” section of this competition guide.

3050 Protests

3050.1 Preconditions for a Protest

The jury shall consider no protest unless the written protest has been made within the time limits indicated under 3050.3. The reason for the protest along with a \$20 protest fee (\$100 for skicross) must be given to the jury. If the protest is accepted, the protest fee will be returned, if not, the organizing committee will retain the fee.

3050.2 Examination of Protests

The jury will meet as soon as it is logistically possible, taking into consideration the urgency of the request.

The jury will invite, for a discussion on protests, the starter and other officials involved, possible witnesses, the competitor concerned and the protesting team captain. In addition, any other material such as videotape, film, photographs, etc., shall be examined. Only the members of the jury will be present for the final decision on the protest. This must have the support of a majority of the entire membership of the jury, not only of those present.

In case of a tie, the TD’s vote shall be decisive. The decision shall be posted on the official notice board immediately after the hearing, with the time of posting. The TD will preside at the hearing.

Minutes of the hearing must be taken and must be signed by the TD.

Protests concerning reruns shall be examined immediately by the jury.

3050.3 Different Types of Protest

3050.3.1 Protests Concerning Qualification

Protests against the qualification of a competitor must be delivered in writing

before the beginning of the draw of the competition, to the place designated on the official notice board.

3050.3.2 Protest Concerning the Course

Protests concerning the course (course not according to the rules, marking, preparation of the course, obstacles, danger points, visibility, etc.) must be presented in writing to the chief of course in good time before the last official training.

3050.3.3 Protests during the Competition

A competitor or team captain, who protests against any action by another competitor or an official during the competition, must take his protest to a jury member within 15 minutes of the distribution or posting of the results of the last competition run of that round of competition.

3050.3.4 Protest Concerning Disqualification

A protest against disqualification must be sent in writing to the place indicated on the official notice board. Such a protest must be received within one hour after the posting of disqualification. In case of doubt over a disqualification, the competitor is entitled to a "provisional" start.

3050.3.5 Protests Concerning Timing

Protests concerning an error in timing must be delivered within one hour after the posting of the unofficial list of results to the place indicated on the official notice board.

3050.3.6 Protests Concerning False Calculation and Clerical Errors

A complaint based not on an alleged breach of the rules on the part of an official or a competitor, but on an alleged error in calculating the results, shall be considered. It must be sent by registered letter through the competitor's association at any time within one month of the date of the competition. If the mistake is verified, a corrected list of results shall be published and the prizes redistributed. The official numerical awards of the judges cannot be protested.

3050.3.7 Protests Concerning Reruns

Protests concerning reruns must be submitted, within 15 minutes of the infraction, to the jury.

3050.4 Appeals

Right of Appeal - An appeal may be made from the decision of the Jury following a properly filed protest. However, the appellant's only basis of appeal shall be that the process undertaken by the Jury failed to afford the aggrieved party his/her due process. Appeals shall be made to the national office in writing within 24 hours of the Jury decision in question. The appeal must be in writing and must set forth the factual basis for the claim that Jury decision at issue failed to protect the allegedly aggrieved party's procedural due process rights. Once received in the national office, the appeal shall be forwarded to the Freestyle Judicial Committee for its consideration. The Freestyle Judicial Committee shall consider only the written evidence provided and unless the appellant demonstrates by clear and convincing evidence that the aggrieved party's due process rights were violated, the Committee shall uphold the decision of the Jury.

In no event shall the filing of an appeal cause the stay of any competition.

3050.5 Cancellation of a Competition

The jury has the right to cancel an event or an entire competition.

The procedure to make up the event (or competition) must be decided upon in an immediate fashion by the jury. If the event or competition cannot be conducted, then the TD must consult with the freestyle/freeskiing sport committee chair to

determine a ruling on making up the competition at a later date, or to permanently cancel the competition.

The TD can decide to interrupt or cancel an event for safety reasons (wind, fog, avalanche, blizzard, etc.).

If an event is to be made up, then the scheduling of the event must not interfere with the time necessary to conduct any other event. Under severe circumstances a single run may be used to constitute an event.

If an appeal is lodged within 14 days after the completion of the competition and is upheld, the results may be changed. Under no circumstances will a competition be rerun due to an appeal.

3054 Competitor Responsibilities

- 3054.1 Insurance information can be found in an earlier chapter of this guide.
- 3054.2 Competitors are responsible for a thorough knowledge of the rules, regulations and judging criteria.
- 3054.3 Competitors must attend the awards ceremony and must be wearing the correct bib. Also, winners must attend media functions. The awards ceremony time must be fixed in the official competitor information. The competitor is not obliged to attend award ceremonies held on any day other than that which the competition is complete.
- 3054.4 Competitors should be familiar with rules 3036 - 3036.4 for all ski competitions concerning the competitor's obligations.
- 3054.5 As a condition of, and in consideration of his/her entries therein, all competitors and their parents, or guardians, shall be deemed to agree to assume all risks of injury to the competitor's person and property resulting from, caused by, or connected with the conduct and management of the competition and to release any and all claims which they may have against the officials, the host national association, and the clubs or organizers holding the competition and against their officers, and their entries shall only be accepted on this condition.

3055 Did Not Start (DNS)

DNS's are imposed for any run in which a skier does not start. The skier shall receive a DNS in the event only if both runs are DNS. The skier shall receive no place in the event. Also see 3030.4.3, 3030.4.5 and 3043.6.

- 3055.1 A skier receiving a DNS in one run and a DNF in the other shall receive a DNF for the event.
- 3055.2 A Dual Mogul competitor, who does not start in a round other than his or her first round, shall receive DNS for that round and be placed equal to the losers of that round.
- 3055.3 In dual moguls, if a competitor enters the course before the start command is completed pursuant to Rule 3043.4.3.2

3056 Disqualifications (DSQ)

- 3056.1 DSQ if a competitor submits any false information or enters a competition under false pretenses.
- 3056.2 DSQ for violating any rules on equipment according to sections 3036.
- 3056.3 DSQ for unsportsmanlike behavior.
- 3056.4 DSQ for an athlete who intentionally attempts, in a sanctioned event, a jump for which they are not properly qualified for that event. This includes any training jumps prior to the start of a competition unless the jump is being performed for a coach as part of the qualifying process.
- 3056.5 All decisions concerning DSQ will be the responsibility of the jury.

- 3056.6 DSQ if a competitor alters a course or jump, or trains on a closed course.
- 3056.7 DSQ if a competitor accepts outside assistance of any form.
- 3056.8 DSQ if a competitor does not observe the safety regulations.
- 3056.9 DSQ will not receive a “place” point in the particular event involved and will eliminate the competitor from eligibility for a combined ranking (at any three event competition). DSQ will appear on final result sheet but will receive no numerical ranking.

3057 Reruns

- 3057.1 A competitor may appeal to a member of the jury for a rerun immediately after he has been obstructed during his run; he must, however, leave the course as soon as possible. The following are considered acceptable reasons for a rerun:
 - 3057.1.1 Obstruction by an official or a spectator.
 - 3057.1.2 Obstruction by an animal.
 - 3057.1.3 Obstruction by a competitor who has fallen and has not cleared the course.
 - 3057.1.4 Obstruction by objects on the course, such as ski poles abandoned by a competitor in a fall.
 - 3057.1.5 First aid measures which obstructed the competitor.
 - 3057.1.6 Obstruction by failure of course to be properly maintained.
 - 3057.1.7 Any other similar instances outside the competitor’s control causing him to fall, slowing him down or lengthening his course, thus significantly influencing the result.
 - 3057.1.8 Failure of the timing, both electronic and hand.
 - 3057.1.9 A jury member can authorize a conditional rerun based on the acknowledgment that the reasons for it must later be confirmed.
 - 3057.1.11 Failure of judges to observe competitors run.
 - 3057.1.12 The competitor, taking the rerun can start in the middle of the interval between two successive competitors, after he reports to and is cleared by the starter.
 - 3057.1.13 If the competitor has already been disqualified before the incident for which a rerun was granted, the rerun will not be valid.
 - 3057.1.14 In the aerial event, immediate rerun for loss of ski(s) before landing. Only one rerun granted for loss of ski(s) for each jump.
 - 3057.1.15 In the aerial event, a jumper may, for reasons of safety, after starting down the inrun, stop and refuse to jump. However, a jumper can only re-start one time if he/she does not stop prior to the jump. If the jumper refuses more than one time, a DNS will be issued to the skier.

3058 Did not Finish (DNF)

A DNF classification in the qualification round will receive no rank on the result list. In the Final round all DNF competitors will receive the same numerical ranking.

All decisions concerning DNF will be the responsibility of the Jury.

The competition officials may impose a ruling entitled “Did Not Finish” (DNF) for any infractions listed below. This list does not restrict the ruling of the officials for any infraction, which may incur and is not listed below.

- 3058.1 For loss of ski(s) any time before landing, during the aerials competition, if a re-run has already been granted for the same reason for that particular round.
- 3058.2 For skiing out of the course boundaries in halfpipe, slopestyle, moguls and skicross, which includes not crossing through the gate line or the finish line. In dual moguls, crossing the middle line of the course. A competitor shall be deemed to have crossed the middle line if both feet cross the line. Except in the case of rule

6205.1 and 6305.1.

- 3058.3 For announcing and performing identical aerials maneuvers (4008.2).
- 3058.4 For a competitors Final run, if not starting in the Finals after performing the Qualification run.
- 3058.5 DNF classification in the skicross Finals will be pursuant to Rule 4505.6.2 and Rule 4510.
- All decisions concerning DNF will be the responsibility of the Finish Referee. The gate judges or Finish Referee may impose a “Did Not Finish” (DNF) for any infraction listed below.
- 3058.6 In moguls and dual moguls a competitor can regain a gate, but they only have 10 seconds to regain the gate. Skiing around a gate and back into the course or out of the course will be a DNF. Define the gate line as the horizontal line between each pair of control gates.

3059 Warnings (Freestyle Events)

- 3059.1 Warning to competitors will be issued using the yellow and red card system.
- 3059.2 3 yellow cards = 1 red card
1 red card = DSQ from the next event competitor is entered in.
- 3059.3 Warnings shall affect only the level of competition in which they are issued. All sanctioned competitions are considered of the same level including qualification and championship events.
- 3059.4 The jury may choose to warn a competitor rather than impose a ruling of DNF or DSQ provided there is a just case in which the competitor may have misunderstood or been confused concerning the ruling or cause of the infraction. Thus, in the case where doubt exists concerning any dispute protest or breach of the rules, the benefit of the doubt should favor the competitor.
- 3059.5 Yellow cards may be imposed against any displays of poor behavior, such as, profanity, display of temper, unsportsmanlike behavior.
- 3059.6 Yellow and red cards will be valid for the twelve month period after such cards are issued. All infractions that result in the issuance of yellow and/or red cards should be reported to the national Freestyle office.
- 3059.7 The Freestyle subcommittee for rules and technical should maintain records on all warnings imposed at all sanctioned competitions.
- 3059.8 The Freestyle sport committee may issue the same warning against officials.
- 3059.9 A skier receiving a DNF for an event will be credited for event attendance for FFSP purposes and will receive a zero for the event.

3060 Competition Protocol

- 3060.1 Freestyle/Freeskiing competitions may be comprised of the following events: moguls, dual moguls, aerials, halfpipe, skicross, slopestyle and big air.
- Freestyle/Freeskiing competitions must provide the opportunity for both men and women to compete.
- A competition may be announced as a one, two, three, four or five event competition. Freestyle competitions should consist, if possible, of all five events.
- A combined event is defined as (1) moguls, (2) aerials and (3) slopestyle (4) halfpipe (5) big air. The athletes will compete in each of the three categories to be a combined skier. A combined event will can also be the sum of three components: (1) the greater of aerials and big air, (2) the greater of halfpipe and slopestyle, (3) moguls.
- 3060.2 Competition Procedures
- In all sanctioned competitions, aerial results will be the total of two jumps, and

moguls will be the best of two runs unless only one run is taken, then it will be the score from the single run except at the Junior Nationals, where it will be the final run except for those only taking one run, then it will be the placings from that run. Dual moguls is an elimination format and is covered in 3060.2.2.

The jury may alter this format to one run in the following circumstances: inclement weather or adverse conditions or to seed for dual moguls etc.

If a competition is interrupted, the competition should be resumed when conditions warrant. The competitors' results up to this point will remain valid if it is possible to complete the event on the same day. If it is not, the results prior to the interruption will be cancelled. In dual moguls, if the qualifications and the round of 16 have been fully completed. In that case, only the uncompleted rounds will be postponed but must be completed on the same competition site. If the event cannot be fully completed, any tied skiers have the results broken by the seeding. The results of the Qualifications of different rounds of the Final will be valid. In moguls where all the competitors have completed his/her first run, this will constitute the complete event.

3060.2.1 Moguls

In the moguls event, all skiers will make two runs down the course with the best scored used for the results.

3060.2.2 Dual Moguls

Dual Moguls is a series of one-run duals with the winner advancing to the next round. Ultimately, the last two remaining will ski against each other for first place.

3060.2.3 Aerials

In aerials all competitors shall have at least two rounds. The rounds are run as individual competitions. The results from the best two rounds are added together and ranked. If all rounds cannot be completed then the results from the completed round will be valid.

3060.2.3.1 Aerials Super Finals (Phases)

Aerial events may, optionally, use the following format: (italicized material is unique to aerials)

1. Q1 (Qualifier 1):

- Skiers compete in one run, running in random order.
- The top skiers advance to F1. The next set of skiers advance to Q2.

2. Q2 (Qualifier 2) (Optional):

- The second set of skiers from Q1 competes in one run, running in reverse order of finish.
- Jumps may not be a repeat of the jump in Q1.
- The top skiers advance to F1. Score is based on the sum of Q1 and Q2.

3. F1 (Final 1):

- The top skiers from Q1, and the top skiers from Q2 compete in one run, running in reverse order of finish in Q1 and then Q2.
- The top skiers advance to F2.

4. F2, F3, etc. (Final 2, Final 3, etc.) (Optional):

- For each successive run, the top skiers from the previous run compete in one run, running in reverse order of finish from the previous run.
- Jumps may not be a repeat of any previous jump in a Final. Repeating the qualifier jump is permitted.

3060.2.4 Halfpipe

In the halfpipe event, all skiers will take at least two runs, with the best score used for the results.

3060.2.5 Slopestyle

In the slopestyle event all competitors will take at least two runs, with the best scored used for the results.

3060.2.6 Big Air

In big air, all competitors will be given at least two runs; the better of the two scores will be used for the results.

3060.3 Cancellation or Postponement of Competition

If a competition is cancelled or postponed, for whatever reason, notice must be given to the national office at the time of cancellation or postponement.

3061 Accidents

3061.1 The TD is responsible for filling out an injury report form for of any accidents or injuries in full detail (see rule 3030.7.1).

3062 Insurance

3062.1 Insurance information can be found in an earlier chapter of this guide.

3065 Organizational Meetings

3065.1 Team Captains' Meeting

The purpose of the team captains' meeting is to provide detailed information concerning competition procedures and activities, determine bib draws, gather competitor qualifications, and handle all necessary organizational matters.

It is then the responsibility of the representative team captains to communicate this information to their respective participants. The head judge, TD, chiefs of courses and all other important competition officials shall attend the team captains' meeting. The chief of competition shall conduct this meeting.

3065.2 Organization Committee Meetings

At sanctioned competitions, there should be several organizational meetings preceding the competition and possibly during the competition. It is the responsibility of the host competition organizer to call to order organizational meetings, as he deems necessary, and to inform the key individuals involved in the event, so that they may attend. Further the results of these meetings should be made known to the key individuals whether or not they were able to attend. It is the responsibility of the chief of competition to communicate the essential information concerning the competition so that all parties may be reasonably informed.

3065.3 Judges' Meetings

The head judge for the competition will be responsible for conducting a judges' meeting prior to the first day of competition. It is highly recommended that the judges meetings commence at least one day prior to the first day of competition. The head judge will be responsible for the communication and coordination of the meeting.

3065.4 Jury Meetings

The jury for a competition will meet at least once before the first team captains' meeting. The jury must also meet once before official training, in order to do an official course inspection. The TD will act as chair in all meetings of the jury.

3065.5 For all venues, before training begins, on the first official training day, the competitors must inspect the course wearing his/her bib numbers in competition fashion and the bibs must be easily visible. The jury shall determine the time of inspection.

3065.6 Immediately after this inspection the TD and other available members of the jury

shall be at the outrun to receive requests and suggestions from the competitors and coaches regarding the venue.

3066 Official training for all events, excluding Skicross, see 4504

- 3066.1 Official training for any event is an inseparable part of the competition. The competitors are required to participate. There will be a starter at training to regulate the flow of the competitors.
- 3066.2 The official training should encompass at least one day before the event, although not necessarily the day prior to the competition. For national level events, the official training shall ideally encompass at least two days before the event, although not necessarily consecutive.
- 3066.3 For aerials, the official training shall be a minimum of one day (two hours of actual jumping time). The jury may reduce this period if sufficient training is available the morning of the event.
- 3066.4 For halfpipe, slopestyle, and big air on the competition day, the competitors are allowed a minimum of two training runs during the designated training time.
- 3066.5 For moguls, there will be a minimum of one hour of official training on the competition day. The Jury may reduce the recommended one hour training if required by conditions. For Junior Nationals moguls competition days, the official time allotment for each of women's and men's training times should be 45 minutes.
- 3066.6 For dual moguls, on the competition day the competitors are allowed a minimum of 30 minutes of training before the competition begins. The Jury may reduce this if conditions require it. For Junior Nationals dual moguls competition days, the official time allotment for each of women's and men's training times should be 45 minutes.
- 3066.7 The entire facility must be properly prepared and have proper medical services available.

3070 Jump Qualifications

This section identifies jump qualification requirements for aerial maneuvers (jumps) used in all moguls, dual moguls and aerial events. This section does not apply to half pipe, big air venues or slopestyle. If there are conflicts regarding jump qualifications with any other section of this Competition Guide, this section shall have precedence.

- 3070.1 Responsibilities
- Both the athlete and athlete's coach share responsibility for ensuring that the athlete is fully qualified to perform any jump in a competition. Qualified jumps must be recorded on the Jump Qualification List. The procedure for recording the jumps will be published at usskiandsnowboard.org on a yearly basis. If an athlete performs a jump in an event that is not listed on the Jump Qualification List, then the athlete will be disqualified from the event if the jump has not been properly qualified with proper documentation.
- 3070.2 Age Limitations for Jumps
- In moguls and dual moguls competitions, a competitor may not perform more than a single inverted maneuver.
- 3070.3 Jump Qualification Process
- 3070.3.1 Jumps Greater than 720° and all Off-axis Jumps greater than 720° and all off-axis jumps require qualification by a Level 2 aerial coach or better. Each time the athlete adds an additional rotation they must be qualified for that rotational upgrade (i.e. 360° to 540° would require a qualification upgrade). For qualification, the athlete shall successfully perform the maneuver five consecutive times on water, foam, air bag or snow for the qualifying coach. Submission of the qualification as defined in

3070.4 is required for these jumps.

3070.3.2 Inverted jumps. Inverted jumps, including all straight over front flips, straight over back flips, will be qualified in accordance with the following table:

Inverted Jump	Recommended minimum number of jumps	Minimum Certified Coach Level to qualify jump
• Single somersault (including single twists) OA up to 720° and rotations of more than 720°	100	Level 2 Aerial coach
• Single somersault with two or more twists and OA over 720° (not including double OA)	100	Level 3 Aerial coach
• Double somersault (including twists) and all Double OA jumps	125	Level 4 Aerial coach
• Triple somersault (including twists) and all other acrobatic maneuvers	75	Level 5 Aerial coach

Athletes must qualify a back layout on water, air bag or foam without position before training other back flips with position (such as back iron cross). Each time the athlete adds an additional rotation they must be qualified for that rotational upgrade (i.e. back flip to back flip with a twist or bF to bDF or front flip to double front flip would require a qualification upgrade). To receive qualification for an inverted jump, the recommended minimum number of jumps shall first be performed on water and the 5 jump qualification procedure successfully completed before attempting the jump on snow. Submission of the qualification as defined in 3070.4 is required for all inverted jumps.

3070.3.2.1 For moguls and dual moguls, in addition to the qualification procedure required by 3070.3.3, before an inverted jump is allowed to be performed in competition it must be further qualified on snow by a level 3 or higher Aerial Coach. This qualification must use the on snow qualifier process as posted at usskiandsnowboard.org under rules and regulations. Once the athlete successfully completes the on snow qualifier, the qualifying coach must enter the qualification as outlined in 3070.4.

3070.3.3 Positions. It is not necessary to include body positions or grabs (i.e., cross, mute grab, tuck, lay-out, misty, or bio, etc.) when qualifying a rotational, off-axis or single inverted maneuver.

3070.4 Submitting Qualifications

When required by these rules, the qualifying coach shall enter the athlete's qualification information using the Online Jump list. Coaches will use the current Qualification Sheet to qualify the jump. This form, instructions for completing it and the link and instructions for the online Jump List, can be found at usskiandsnowboard.org. The Qualifying coach must retain all athlete qualification forms for a period of 7 years.

3070.5 New Maneuvers.

3070.6 Suspension of Qualification

Competitors are subject to suspension for that competition of his/her qualifications by any member of the jury with agreement of the jury if they have shown an inability to perform the maneuver in a safe manner for which they have been qualified.

3070.7 The national ski associations have the right to further restrict their athletes from participation in inverted aerials.

3070.8 Coach Certification Process

Coaches shall prescribe to the following requirements for certification:

Mogul Coaching Level Requirements

Level 1 - Level 100 clinic / First Aid / ASEP

Level 2 - Level 200 clinic / Level 1 Mogul cert. / Level 2 Aerial cert. / min 2 years. Professional coaching (minimum of 25 days per year – days can be accumulated over more than 2 years, but not less than 2 years)

Level 3 under development

Aerial Coaching Level Requirements (this will also include Freeride off axis jumps)

Level 2 - Attend a Level 200 clinic / Level 100 cert. (any discipline, USASA or other snow sport which must include First Aid, CPR & ASEP / Must complete the level 2 Coaching knowledge / Skills Assessment / Must have 2 years professional coaching (minimum of 25 days per year – days can be accumulated over more than 2 years, but not less than 2 years)

Level 3 – Level 2 certification, Must complete the Level 3 Coaching Knowledge / Skills Assessment. Must have 2 years professional coaching (minimum of 25 days per year – days can be accumulated over more than 2 years, but not less than 2 years)

Level 4 - Level 3 certification, Must complete the Level 4 Coaching Knowledge / Skills Assessment, Must have 5 years professional coaching (minimum of 25 days per year – days can be accumulated over more than 5 years, but not less than 5 years)

Level 5 - Level 4 certification, Must complete the Level 5 Coaching Knowledge / Skills Assessment, Must have 10 years professional coaching (minimum of 25 days per year – days can be accumulated over more than 10 years, but not less than 10 years)

What the coaching Levels allow:

Coaching Certification levels:

Level 2 Mogul or Aerial coach may qualify upright and off axis aerial maneuvers. Rotational maneuvers of more than 1080 and single somersaults (including single twists and all loops)

Level 3 Aerial Coach may qualify single flips with more than one twist and “standard” off axis jumps over 1080 (but not including “double” off axis) also minimum level to be a designated on snow qualifier)

Level 4 Aerial Coach may qualify double somersaults (including twists) and “double” off axis jumps.

Level 5 is unlimited

Note that Level 2 Mogul certification requires Level 2 Aerial cert. as prerequisite.

4000 AERIALS

4001 Definition

Aerial competition shall consist of two different acrobatic leaps from a prepared jump(s), stressing takeoff, height and distance (referred to as “air”), proper style, execution and precision of movement (referred to as “form”) and “landing”.

4002 The Aerial Site

4002.1 Joint Regulations for Men’s and Women’s Aerial Sites

4002.1.1 Aerial sites for all events in the Freestyle calendar must conform to the current standards for aerial courses (see appendix later in this Guide).

4002.1.2 General Characteristics of the Aerial Site

The aerial site must be constructed according to the specifications as established

by FIS and/or U.S. Ski & Snowboard as applicable. The snow conditions must be prepared to ensure competitor safety, and the course must be properly set and free of all hazards. All measurements taken are in degrees as opposed to percentages.

4002.1.3 Layout of the Aerial Site

Aerial sites should be constructed from earth whenever possible. If not practical, then a natural location should be chosen, and in the last choice, the facility could be constructed solely of hay bales or snow. In order to assure the correct facility is available, this construction should precede the competition by a reasonable period of time as indicated by the TD.

The aerial site should be located where spectators can have easy access, where facilities and services are located nearby, and if possible, where snowmaking can service the site.

The aerial site should not have any obstacles or obstructions that will cause any inconvenience or difficulty for the competitor. There should be ample space available in the start and finish area for the competitor to maneuver.

4002.1.3.1 Three wind indicators must be on the aerial site, one on the start and two on the knoll.

4003 Scoring

A split scoring system will be used at all aerial events. The competitor's acrobatic skiing will be judged on three basic components as follows:

4003.1 Air; consisting of 20% of the score.

4003.2 Form; consisting of 50% of the score.

4003.3 Landing; consisting of 30% of the score.

The judges will each evaluate the competitor's performance based upon the criteria set forth in section 6004. The score will be multiplied by the appropriate degree of difficulty factor (DD) to determine the total score for each jump. The competitor's final score for both jumps is determined by adding together the total scores from each jump.

For judging criteria, refer to section 6004.

4004 Scoring Procedure

See rule 3045.3 for calculation of scores.

4004.1 Split Scoring System

Refer to section 6003.

4005 Calculation of Degree of Difficulty

Refer to rule 6006 of the Rules for Scoring.

4008 Special Procedures

4008.1 Loss of Ski(s)

See Rule 3057.1.14 and 3058.1

4008.2 Definition of Different Jumps

A competitor must announce his/her jump and perform two different aerial jumps. Refer to section 6008 for information regarding which jumps are considered to be different.

4008.3 Starting Time

The jumpers have a maximum of 15 seconds to start down the in-run after being told that the course is clear and the judges are ready. Refusal to start will be treated as a balk. (See Rule 3057.1.15)

4200 MOGULS

4201 Definition

Moguls competition should consist of two runs on a steep, heavily moguled course, stressing technical turns, speed, and aerial maneuvers.

4202 The Moguls/Dual Moguls Course

4202.1 Joint regulations for men and women's mogul/dual mogul courses

4202.1.1 Moguls/dual moguls courses for Junior Nationals and U.S. Freestyle Championships must conform to the specifications as set by U.S. Ski & Snowboard and/or FIS.

4202.1.2 General characteristics of the moguls/dual moguls site

The moguls site must be uniformly covered in moguls, with a reasonably constant pitch and fall line, free of obstacles, with satisfactory snow cover.

4202.1.3 Layout of the moguls/dual moguls site

The moguls site should have a constant gradient with one continuous fall line.

The slope should not be overly concave or convex, nor should it have distinct changes in gradient.

The course should be as evenly covered in moguls as possible. Hard, sharp bumps should be smoothed out, deep ruts, ice balls and snow machine tracks should be removed. Bumps that throw the competitor too far into the air should be modified. All Senior, A's, Open and Champ events must follow the most current FIS rules in regard to Jump specifications and Landing Zone specifications. With respect to jumps, they should not be continuous across the course, such as "pro jumps" and should conform to Course Specifications for Moguls. Chopping of the landing area must take place due to safety concerns (see 3034.1.3).

When snow cover is minimal, the organizing committee must transport additional snow to safely cover the course.

The jury may postpone or cancel an event if the moguls do not satisfactorily meet a reasonable minimum to constitute a mogul competition.

Obstacles, which a competitor may hit, must be marked if they cannot be covered, whereas snow, safety nets, or other devices must protect obstacles on the sides of the course.

At least nine control gates plus the start and finish must be located on the course to mark 10 evenly spaced intervals with gates measuring 8 m - 12 m apart.

4202.1.4 Preparation and inspection of the moguls site

4202.1.4.1 The moguls site must be completely prepared for skiing at least one day before the moguls event, and must then be available for training.

4202.1.4.2 To improve upon marginal lighting conditions, the organizer may color the moguls, add pine bough branches, etc.

4202.1.4.3 Some moguls may be modified for use as air bumps (see 4202.1.3). There should be air bumps at the top and bottom of each course in approximately the same positions. The takeoff of the top air bumps should be placed at 15% of the course length and the takeoff of the bottom air bumps should be placed at 20% from the finish line.

4202.1.5 Official Training

4202.1.5.1 There will be a minimum of one hour of official training on the competition day.

4203 Scoring

A split scoring system will be used at all mogul events. The competitor's mogul skiing will be evaluated on three basic components as follows:

4203.1 Turns; consisting of 60% of the score.

Refer to rule 6204.1

4203.2 Air; consisting of 20% of the score.

Refer to rule 6204.2

4203.3 Speed; consisting of 20% of the score.

Refer to rule 6204.3

The judges shall evaluate each competitor's performance with respect to "turns" and "air" as further described rules 6204.1 and 6204.2. The speed score as calculated in accordance with rule 6204.3 and shall be added to the total of the judges' scores to determine the final moguls score for each competitor.

The competitor should be judged from the time that the run is started until he/she crosses the finish line. The skier should come to a safe and complete stop in the finish area. Aerial maneuvers landing beyond the finish line will be disregarded.

4204 Scoring Procedure

See rule 3045.3 for calculation of scores.

4204.1 Split Scoring System

Refer to section 6203.

4204.2 Pace Time

The pace time will be calculated at 9.7 m/sec for men and 8.2 m/sec for women.

4206 Special Procedures

4206.1 Refer to section 6205.2

4300 Dual Moguls

Dual moguls competition consists of moguls skiing on a heavily moguled course. Technical turns, speed and aerial maneuvers are used to evaluate the skiers with the winner of each round advancing to the next round as further explained in rule 4305 and rule 4306.4

4302.1 Joint regulations for women's and men's dual moguls courses (see 4202)

4302.1.1 Nine control gates (markers or Slalom poles) designating the outside of the course and the center line must be located on the course at equally spaced intervals. Moguls may be machine constructed an all care must be taken to assure the courses are equal in respect to lines and number and size of the moguls.

4302.1.2 The dual moguls site must be completely prepared for skiing at least one day before the dual moguls event, and must then be available for training.

4302.2 Official Training

4302.2.1 On the competition day the competitors are allowed a minimum of 30 minutes of training before the competition begins. The Jury may reduce this if conditions require it.

4303 The competitor's moguls skiing will be evaluated on three basic components as follows (see 3045.3 for general scoring procedures):

4303.1 Turns; (Definition refer to the Freestyle Judging Manual 6204.1 to 6204.1.3 and 6304.2.1)

4303.2 Air; (Definition refer to the Freestyle Judging Manual)

4303.3 Speed; (Definition refer to the Freestyle Judging Manual)

4304 Judging Procedure

A panel of judges shall administer scores based upon specific duties for each judge, as set forth in the Freestyle Judging Manual 6205.

The judges should evaluate the competitor's performance with respect to "turns", "air" and "speed" as further described in the Freestyle Judging Manual.

The competitor should be judged from the time the run is started until he crosses the finish line. The skier should come to a controlled and complete stop in the finish area. Aerial maneuvers landing beyond the finish line will be disregarded.

4305 Competition Procedure

Seeding will be done according to either the most recent national points list for dual moguls or the most recent moguls event either that morning or the previous day. At all sanctioned events, at the discretion of the Jury, all skiers will then be seeded according to FIS normal bracketing.

Color (or side) of course will be predetermined in the following manner:

Round of 128	top skier in pairing will be red
Round of 64	top skier in pairing will be blue
Round of 32	top skier in pairing will be red
Round of 16	top skier in pairing will be blue
Round of 8	top skier in pairing will be red
Round of 4	top skier in pairing will be blue
Final Rounds	top skier in pairing will be red

In all cases the left side (looking up the hill) will be the blue course and the right side will be the red course. The ranking to the eighth place will be determined by skiing. A minimum of two athletes is required in duals for an event to be scored.

Points formula and small event formula is located at usskiandsnowboard.org.

4306 Special Procedures

4306.1 Aerial Maneuvers

Identical jumps performed within a mogul and dual mogul run shall be considered repeated jumps, as determined by the judges. Once determined if the jumps are repeated, only the higher scoring of the two will count.

4306.2 Dual Moguls Start Device

The start ramp shall be prepared in such a way that the competitors can stand relaxed on the starting line and can quickly reach full speed after leaving the start. The specifications can be adjusted to the needs of the specific course.

The start gates are to be placed in the center of each of course.

The gates have to open simultaneously and it must be impossible for a competitor to open the gates himself.

Example:

Two hinged gates each 100 cm wide and 40 cm in height. The starting block (behind the board) must be covered with Teflon to protect the ski. The weight for each hinge gate is 15 kg.

The bolt (lock) system should operate in such a way that both gates open outwards on operation of a single control mechanism. Mechanical controls are preferred over electrical ones, for reasons of reliability and portability.

4306.3 Dual Moguls Format

4306.3.1 Dual moguls finals will be women 3rd and 4th, then women 1st and 2nd, then men 3rd and 4th, men 1st and 2nd.

4306.3.2 Dual Moguls Control Gates

At all dual moguls courses, there shall be nine control gates to divide the course into ten even parts.

4306.3.3 The width of each dual course should be 6.5 m \pm 0.5 m.

4500 Skicross

After a timed qualification run, a group of skier's race against each other on a specially prepared skicross course that includes different types of turns, jumps, waves and other freestyle/freeskiing terrain features.

4501 Technical Data

4501.1 Vertical Drop

4501.1.1 Courses for all events must be a minimum of 130 vertical meters to a maximum 250 vertical meters. The same course may be used for, men and women. Average slope should be between 12°-22°.

4501.1.2 The total times for course shall be between 35 - 60 seconds.

4501.2 Gates and Poles

4501.2.1 Type of Poles to be used

A skicross gate consists of a triangular gate panel attached to one non-breakaway non-hinged, static or fixed base, outside pole and on the inside or turning side a hinged, or breakaway, 45 cm long stubby pole (turning pole).

4501.2.2 Color of Gates

Consecutive gates must alternate in color unless the gate defines a corridor or banana. The color of the triangular gate panel and the poles must be the same.

4501.2.3 Triangular gates must be used with the following sizes:

Discipline	Base	Long side	Short side
SX	130 cm	110 cm	55 cm
SX	100 cm	80 cm	40 cm

The turning pole must be a stubby pole (45 cm).

4501.2.4 Triangular gates have to be placed at the bottom of the gate.

4501.2.4.1 The gates must be set so that the competitors can distinguish them clearly and quickly even at high speeds. The gate should be set at right angles to the competition line. In certain circumstances, skiers may be required to pass between two gates of the same color (for example: corridors).

4501.2.4.2 The gates must be set on both sides of all features such as rollers and take off of jumps as well as the finish line. Placing gates in blind locations such as landings shall be avoided. In flat non-banked turns, banked turns or any other type of turns a single turning gate shall be set and no outside gate will be required.

4501.2.5 Correct Passage

A gate has been passed correctly when both the competitor's ski tips and both feet have passed across the gate line. If a competitor loses a ski, without committing a fault, e.g. not straddling a gate, then the tip of the remaining ski and both feet must have passed the gate line. The gate line is the imaginary shortest line between the two turning poles. (See ICR Alpine 661.4). Wherever a turning gate only is required to be set, the gate line is the extension of the line from the outside pole of the gate to the gate to the turning pole which lies past the turning pole and extends into the course.

4502 The Skicross Course

4502.1 General characteristics of the courses.

The slope should preferably be of a medium pitch (not flat/not steep-ideally 12°-22°) with varied terrain with an average slope of 15°. The skicross slope should be a minimum of 30 m wide. The skicross track width for 4 to 6 skiers shall be no less than 5 m in width. Under certain conditions for short sections (50 m or less) the course width may be a minimum of 20 m.

4502.2 The ideal skicross course will allow for the construction of all or some of the following terrain features: banks (crescent shaped), double banks, single, double, or triple jumps, rollers, offset rollers - (single, double, triple, etc.), step-up jumps, spines and double spines, pro style jumps, hip jumps, table top jumps, and medium or long GS type turns (when building a feature is not possible).

Other terrain features can be built but safety considerations must always be a priority. Gap jumps will not be permitted under any circumstances.

The features should be designed so that competitors are attempting to gain speed and not having to break before each one.

4502.3 Course preparation

The track should be closed to the public at least 24 hours before the training. Terrain features and jumps must be built with sufficient time so that the snow has been compacted to insure that they can be properly maintained during training and competition. The use of artificial means is permitted (salt, water, etc.).

4502.4 Course Design

The total number of terrain features and jumps should be at the discretion of the course designer but will incorporate as many different possibilities as is practical. Blind jumps or terrain features where a competitor is unable to see the landing from the take-off should be avoided. The course should be designed to separate the competitors as quickly as possible after the start (e.g. 3-5 rolls or other terrain features between the start and the first turn). These terrain features should be placed in a straight line from the start to the first turn. Minimum distance of the straight section of the course between the start and the first turn should be no less than 60 meters. The arc of the first turn shall be no less than a 100 degrees change in direction (i.e. the degrees difference between the entrance and the exit of the turn).

The first turn is usually the largest turn of the course, wide enough to accommodate all competitors at once. The Start should be designed in such a way that the competitors can gain speed without using their ski poles or skating.

4503 Course Setting

4503.1 The setting of the gates must be done before the official inspection and should incorporate the skillful use of the terrain with the integration of terrain features and jumps into the setting. Minor adjustments in the setting may be necessary during the training to adjust the course for a smooth race line. Any changes made during training should be announced in the start area so all competitors and Team Captains are aware of such changes.

4503.2 Gate Setters

The course setting shall be performed by the Connection Coach together with the Chief of Course in consultation with the Jury and the Competitor Advisory Committee.

4504 Competition Program

4504.1 Inspection

The competitors are allowed to inspect the course by slowly sliding down through or alongside the course. Inspection times are at the discretion of the Jury but should be a minimum of 30 minutes. All competitors are required to complete at least one inspection run prior to training. Competitors must visibly wear their bibs and their helmets during the inspection.

4504.2 Official Training

Scheduling should allow for 2 training runs per competitor in all training sessions.

4504.2.1 Competitors not wearing their bibs will not be allowed to participate during official

training.

4505 Execution of Skicross

- 4505.1 Finals are based on 8 to 32 men and 8 to 16 women with 2 to 4 skiers per heat.
- 4505.2 Skicross will be run according to a single knockout format. Timed runs are used to qualify skiers for the skicross.
- 4505.2.1 Two possibilities for timed trials qualification.
- 1) Qualification with one run – all skiers have one timed run
 - 2) Qualification with two runs – all skiers have two timed runs the better of two runs determines the qualification-ranking list (same start list for both runs).
- 4505.2.2 In the Qualification race, if two or more competitors have the same time (tied), then skier that started later in the race, will win the tie.
- 4505.2.3 Ties in Heats before the Final
In case of an unbreakable tie in the heats (between the 2nd, and 3rd or 3rd and 4th placed competitors), the competitor with the lowest qualification rank will advance.
- 4505.2.4 Unbreakable Ties in the Final
In case of an unbreakable tie in the small final or the big final, they will remain tied.
- 4505.3 The two skiers (four skiers per heat) or three skiers (six skiers per heat) advance from round to round as determined by his/her place of finish in each heat.
- 4505.4 Determination of place
Place of finish is determined by the first part of the body that cross finish line.
- 4505.4.1 Whenever, possible, a finish line camera (video or photo finish) should be available. In case of a tie (between the 2nd and 3rd / 3rd or 4th place skiers in the heat only), the skier with the lowest qualification time will advance.
- 4505.4.2 In a case where more than one competitor does not complete the course nor cross the finish line, rankings will be based on the competitor who made it further down the course, will receive the better rank.
- 4505.5 Race Bibs
Race Bibs are numbered on front, and back for better visibility by the course judges. The main 4 colors of the bibs will be Red, Green, Blue and Yellow. White and Black will be used additionally if a 6-person format is used.
- 4505.6 Gate Judges
Gate Judges - between four and eight gate judges (with radios connected with the finish-referee) on a skicross is necessary. They must be familiar with the rules (inspection, training, gate-DSQ and contact etc.).

4506 Skicross Finals Pairings

Pairings for the finals will be according to the following but may consist of as few as 1 heat with only 2 competitors:

4506.1 Finals

Ranking for 8 heats/4 per heat (32) Men

Heat #	1st Pos	2nd Pos	3rd Pos	4th Pos
1	1	16	17	32
2	8	9	24	25
3	5	12	21	28
4	4	13	20	29
5	3	14	19	30
6	6	11	22	27
7	7	10	23	26
8	2	15	18	31

4506.2 Ranking for 4 heats/4 per heat (16) Women or Men

Heat #	1st Pos	2nd Pos	3rd Pos	4th Pos
1	1	8	12	16
2	4	5	9	13
3	3	6	10	14
4	2	7	11	15

4506.3 Ranking for 2 heats/4 per heat (8) Women or Men

Heat#	1st Pos	2nd Pos	3rd Pos	4th Pos
1	1	4	6	8
2	2	3	5	7

4507 The Start

4507.1 Bibs

Qualification Bibs are numbered on front and back for better visibility by the course judges.

4507.2 Bib Colors for the Finals

For the Final, the main 4 colors of the bibs will be Red, Green, Blue and Yellow. White and Black will be used additionally if a 6-person format is used.

4507.3 Bib Assignment for the Final

Assignment of the bibs in each heat is based upon the competitors' qualification ranking. The highest ranked competitor in the qualification is assigned the red bib and can choose the lane first. The second ranked competitor is assigned the green bib, the third ranked is assigned the blue bib and the fourth ranked is assigned the yellow bib.

4507.4 Ready for Start

It is the competitors' responsibility to arrive at the start gate in time. A missed start is a Did Not Start (DNS).

4507.5 Start Interval for Final Phase

During the Team Captains' Meeting before the final phase, a start interval will be announced by the Jury.

4507.6 Start Gate Lanes and Start Positions

Each starting position is identified by the Lane of the Start Gate.

Looking up the course to the Start Gate the positions are set from left to right: For a four (4) competitor Ski Cross, Position 1 is to the far left and Position 4 to far right. For a six (6) competitor Ski Cross, Position 1 is to the far left Position 6 is to the far right.

4507.8 Ski Cross Start Ramp and Start Device

4507.8.1 The Start Ramp

The Start Ramp shall be prepared in such a way that the competitors can stand relaxed in the starting device and can quickly reach full speed after leaving the start.

4507.8.2 Placement of the Start Gate

The start gates are to be placed in the center of the course. The gates have to open simultaneously and it must be impossible for a competitor to open the gates themselves or block the opening of the gate by applying force to the gate.

4507.8.3 Ski Cross Start Gate Standards

Hinged gates, each 100 cm wide and 40 cm in height. There shall be 60 cm between the outside edges of each gate section. It should be possible to have the height of the handles at 95 cm above the snow level and set parallel to the hinged

gate. Different positions for the handles should be available for children and junior competitors.

The size of each handle shall be 10 cm long with a width between 3 cm to 4 cm. The width between the ends of each handle needs to be between 80 cm to 90 cm. The starting surface of the gate must be covered with a protection for the skis. The gate must have sufficient weight to operate properly.

The locking system should operate in such a way that the gates open outward, at least past 45 degrees, on operation of a single control mechanism.

4507.8.3.1 Electronic Release Device

It is permissible to use an electronic device to open the drop door. Every drop door needs to be locked into place and then released from the same electronic impulse. The random release time must be between 0.0 and 4.0 seconds. For the Start Command, on 'attention' (see 4507.7), the random sequence is begun by the Starter.

The electronic release device must also have a back-up power source available that can meet the demands of a minimum of 20 start sequences. If this back-up system fails it must be possible to operate the start gate through the use of a mechanical starting release system.

4507.8.4 Start Command

"We are ready for the next Heat, proceed to the Start Gate"

"Enter the Start Gate" (30 seconds before the start command)

"Skiers Ready!", then "Attention!" followed by the Starter opening the start gate (or in the case of an electronic release device being used; the Starter beginning the random start sequence).

4508 Contact

4508.1 Definition of Contact and Blocking

Intentional contact by pushing, pulling or holding another competitor's arm, leg or pole or other means, which causes another competitor to slow down, fall or exit the course is not allowed and is an automatic disqualification.

A competitor is not allowed to bring their arm, leg or ski pole in front of another competitor's body to avoid being passed. Blocking, by intentional movements of the body or leaving the natural skiing line is not allowed. The "natural skiing line" is defined as the fastest way between the features and around the gate line. All contact infractions will be at the discretion of the gate judges and the Jury.

4508.2 Disqualification for Intentional Contact (DIC)

Should a competitor be disqualified based upon an infraction of rule 4508.1 such competitor shall be Disqualified for Intentional Contact (DIC) and will not be ranked in the competition.

4508.2.1 Re-runs shall not be granted solely as a result of a violation of Rule 4508.1 and all competitors in the heat, other than those that receive a DIC, shall be ranked as they finish. Re-runs will only be given pursuant to the applicable provisions of Rule 3057.

4508.2.2 All violations of Rule 4508.1 which result in a DIC shall be announced in the finish area and communicated to the competitor that received the DIC or their Team Captain as soon as possible and in any event prior to the commencement of the next heat. The DIC will then be posted on the official notice board at the bottom and top of the course indicating the section of the course where the infraction occurred. All DIC decisions must be recorded and reported by the FIS Technical Delegate in their TD Report.

4508.2.3 When a competitor receives a 2nd DIC in one competitive season, the Jury is required to refer the competitor to the Appeals Commission pursuant to Rule 224.13.

4508.2.4 Should any competitor in a heat feel that a violation of Rule 4508.1 occurred in that heat and was not announced to be a DIC, they may request of the Finish Referee or any other member of the Jury that the heat be reviewed. Such request must be made prior to the start of the next heat.

4509 Protests

There shall be no protests of a decision that a competitor has violated Rule 4508.1.

4510 Final Ranking

4510.1 Four Person Format

Skiers 1 to 4 are ranked according to his/her place of finish in the final heat. Skiers 5 to 8 are ranked according to his/her place of finish in the consolation round. All remaining skiers are ranked according to the round they go out in (i.e. quarter finals) and his/her qualification times within that round. (Example: skiers ranked 8 to 16 in the quarterfinal would be ranked according to his/her qualification times.)

4510.2 Six Person Format

Skiers 1 to 6 are ranked according to his/her place of finish in the final heat. Skiers 7 to 12 are ranked according to his/her place of finish in the consolation round. All remaining skiers are ranked according to the round they go out in (i.e. quarter finals) and his/her qualification times within that round. (Example: skiers ranked 13 to 24 in the quarterfinal would be ranked according to his/her qualification times.)

4511 Equipment

4511.1 Thickness of ski boot soles

See FIS Equipment Rules Section E, 4.0.

4511.2 Number of skis

Each competitor is limited to two pairs of skis on the race day (Qualification and Final). The Organizer will mark the skis.

4511.3 Helmets

The competitors are required to wear helmets for all inspection, training, timed trails and competition.

4511.4 Ski suits

Ski suits must be two pieces- pants and a separate top. Form-fitting Lycra, speed or downhill suits are not permitted. Competition suits may not be plasticized.

Non-protruding body protection and padding is recommended.

4600 Halfpipe

4601 Definition

The halfpipe is a channel constructed in the snow. Skiers perform his/her run in the halfpipe. A panel of judges will evaluate the performance based upon overall impression.

4602 The Halfpipe Site

4602.1 The halfpipe site must conform to specifications as outlined in the competition course specifications. See appendix C.

4602.2 The halfpipe must be finished and ready for training at least one day prior to the start of competition and must be available for training on the day of the event.

4602.3 The drop in area shall give the competitors the opportunity to enter the halfpipe with speed.

4602.4 The lips (tops of each wall) of the halfpipe must be clearly marked with color. Ideally, transitions lines are dyed as well.

4603 Competition Procedure of Halfpipe

4603.1 Best of Two Runs

All competitors will be given two runs; the best of two scores will be used for the results.

4603.2 Halfpipe Qualifications

4603.3 Use of Heats in Halfpipe Competition

Heats are recommended in the halfpipe qualification. Competitors can be run in heats of 20-30. For example: a field of 60 men would be split into two groups, 30 men in each heat. The most current FFSP list should be used to seed the athletes evenly into the heats as fairly as possible. They would be given a 30 minute practice and then take his/her scored runs.

Heat 1, 30 men – Practice, then two scored runs, best score counts

Heat 2, 30 men – Practice, then two scored runs, best score counts

The heat format can be set up for 20-30 competitors and the practice session should be held before each heat and only for those competitors. Practice times can be adjusted to fit schedule and number of athletes. The heat format allows the judges to focus on only one heat at the time.

Finals – a set number of athletes from each heat and the next best set of athletes overall will advance to the finals. For example: 6 men from each heat, plus the next 4 best overall men will advance to finals for a 16 man finals field.

4603.4 The qualification format for a Big Air event may be modified, providing the Jury approves the modified format.

4603.5 Once a competitor has started his run, he is not allowed to re-start. In extenuating circumstances, the Jury may grant a re-run see 3057.

4604 Competitor Training

4604.1 Competitors should be given a minimum of two training runs prior to the start of competition, see 3066.

4604.2 There shall be no specific start order during training.

4604.3 Training times will be communicated by the competition committee during the team captains'/riders meeting.

4605 Start/Finish Area

4605.1 The start area shall permit the competitor to safely drop into the pipe. The start area shall conform to the guidelines as outlined in 3043.

4605.2 The finish area must be big and level to allow the rider to come to a safe and complete stop after the last possible hit.

4605.3 The placement of the finish line is determined by the Head Judge and marked by painting a colored line across the bottom of the pipe and up the walls. For a trick to count towards a competitor's score, the competitor must takeoff on or before the finish line.

4606 Judges Stand

4606.1 The minimum size of the judging area must be 8 m by 2 m. The judges viewing area should be constructed to provide ample room for the appropriate number of judges.

4606.2 The judges' area should be fenced or protected from competitors and spectators.

4607 Special Procedures: Halfpipe

4607.1 Loss of Ski(s) and Stops

If a competitor loses a ski before he may finish on one ski. The competitor will be judged according to his/her performance. If the competitor does not continue the

run and fails to put his/her ski back on in a 10 second time limit, they will be judged up to that point. If a competitor loses both skis, they will be judged up to that point. If a competitor stops in the halfpipe for more than 10 seconds, the competitor will be scored up to that point. The competitor should exit the pipe as soon as possible.

4700 Slopestyle

4701 Definition

Competitions shall consist of multiple features found in a terrain park. The skier performs his/her run using these terrain features. A panel of judges will evaluate the performance based upon overall impression.

4702 The Slopestyle Site

4702.1 The slopestyle course shall fall within the specifications as outlined in the competition course specifications. See Appendix A.

4702.2 The slopestyle course must be finished and ready for training at least one day prior to the start of competition and must be available for training on the day of the event.

4702.3 Each feature on the course must be clearly marked with dye.

4703 Competition Procedure of Slopestyle

4703.1 Best of Two Runs

All competitors will be given two runs; the better of the two scores will be used for the results.

4703.2 Slopestyle Qualifications

4703.3 Use of Heats in Slopestyle Competition

Heats are recommended in the slopestyle qualification. Competitors can be run in heats of 20-30. For example: a field of 60 men would be split into two groups, 30 men in each heat. The most current FFSP list should be used to seed the athletes evenly into the heats as fairly as possible. They would be given a 30 minute practice and then take his/her scored run.

Heat 1, 30 men – Practice, then two scored runs, best score counts

Heat 2, 30 men – Practice, then two scored runs, best score counts

The heat format can be set up for 20-30 competitors and the practice session should be held before each heat and only for those competitors. Practice times can be adjusted to fit schedule and number of athletes. The heat format allows the judges to focus on only one heat at the time.

Finals – a set number of athletes from each heat and the next best set of athletes overall will advance to the finals. For example: 6 men from each heat, plus the next 4 best overall men will advance to finals for a 16 man finals field.

4703.4 The qualification format for a Big Air event may be modified, providing the Jury approves the modified format.

4703.5 Once a competitor has started his run, he is not allowed to re-start. In extenuating circumstances, the Jury may grant a re-start.

4704 Competitor Training

4704.1 Competitors should be given a minimum of two training runs prior to the competition, see 3066.

4704.2 There shall be no specific start order during training.

4704.3 Training times will be communicated by the competition committee during the team captains'/riders meeting.

4705 Start/Finish Area

4705.1 The start area shall set following the guidelines as outline in 3043. The inrun allows the skier to have the correct speed for the run.

4705.2 The Finish Area for the competition must be satisfactorily large enough to allow the skier to stop.

4706 Judges Stand

4706.1 If possible, the judges' stand should be in a location that allows them to see the entire course. Judges panel may be split between the features if needed. The jury will set the placement of the judges. Content of the course must be considered in the process. Visibility, and the appropriate weighting, of each of the features needs to be carefully planned when selecting the judges stand location (s).

4706.2 The judges' area should be fenced or protected from competitors and spectators.

4707 Special Procedures: Slopestyle

4707.1 Loss of Ski(s) and Stops

If a competitor loses a ski he/she may finish on one ski. The competitor will be judged according to his/her performance. If the competitor does not continue the run and fails to put their ski back on within the 10 second time limit, they will be judged up to that point. If a competitor loses both skis, they will be judged up to that point. If a competitor stops in the slopestyle for more than 10 seconds, the competitor will be scored up to that point. The competitor should exit the course as soon as possible.

4800 Big Air

4801 Definition

Competitions shall consist of a jump maneuver performed off of a feature that can be found in a terrain park. The skier performs his/her run using this jump. A panel of judges will evaluate the performance based upon overall impression.

4802 The Big Air Site

4802.1 The Big Air course shall fall within the specifications as out-lined in the competition course specifications. See Appendix A & C.

4802.2 The Big Air course must be finished and ready for training at least one day prior to the start of competition and must be available for training on the day of the event. The inrun should have sufficient angle to accommodate both flips and spins.

4802.3 The jump must be clearly marked with dye.

4803 Competition Procedure of Big Air

4803.1 Use of Heats in Big Air Competition

Heats are recommended in the Big Air qualification. Competitors can be run in heats of 20-30. For example: a field of 60 men would be split into two groups, 30 men in each heat. The most current FFSP list should be used to seed the athletes evenly into the heats as fairly as possible. They would be given a 30 minute practice and then take his/her scored run.

Heat 1, 30 men – Practice, then two scored runs, best score counts

Heat 2, 30 men – Practice, then two scored runs, best score counts

The heat format can be set up for 20-30 competitors and the practice session should be held before each heat and only for those competitors. Practice times can be adjusted to fit schedule and number of athletes. The heat format allows the judges to focus on only one heat at the time.

Finals – a set number of athletes from each heat and the next best set of athletes overall will advance to the finals. For example: 6 men from each heat, plus the next 4 best overall men will advance to finals for a 16 man finals field.

4803.2 Modified Formats

The qualifications format for a Big Air event may be modified, providing: the

modified format is approved by the Jury (art. 2004).

Modified formats could include using a double-up judging panel, Jam formats and a Ranking system and could be used both in the qualification or finals. Please note that all modified formats are variations of heats and use either one judge team or the double-up judge format.

4803.3 Once a competitor has started his run, he is not allowed to re-start. In extenuating circumstances, the Jury may grant a re-start.

4803.4 Jump maneuvers do not need to be called.

4803.5 Jumps may be repeated.

4804 Competitor Training

4804.1 Competitors should be given a minimum of two runs prior to the competition, see 3066.

4804.2 There shall be no specific start order during training.

4804.3 Training times will be communicated by the competition committee during the team captains'/riders meeting.

4805 Start/Finish Area

4805.1 The start area shall set following the guidelines as outline in 3043. The inrun allows the skier to have the correct speed for their run.

4805.2 The Finish Area for the competition must be satisfactorily large enough to allow the skier to stop.

4806 Judges Stand

4806.1 If possible, the judges' stand should be in a location that allows them to see the entire course. The jury will set the placement of the judges.

4806.2 The judges' area should be fenced or protected from competitors and spectators.

Rules for Scoring

6000 AERIALS

6001 Definition

Aerial competition shall consist of two different acrobatic leaps from a prepared jump(s), stressing take-off, height and distance (referred to as "air"), proper style, execution and precision of movement (referred to as "form") and landing. See Rule 3060.2.3 concerning Semi-Finals and Finals.

6002 Scoring

The competitor's acrobatic skiing will be judged on three basic components as follows:

6002.1 Air Consisting of 20% of the score 0.0 - 2.0

6002.2 Form Consisting of 50% of the score 0.0 - 5.0

6002.3 Landing Consisting of 30% of the score 0.0 - 3.0

6003 Scoring Procedures

6003.1 Judging Format

Judges shall independently evaluate the competitor's performance based upon the Air and Form Criteria as stated in 6004.1, 6004.2 and the Landing Criteria in 6004.3. The high and low scores of each component will be discarded and the remaining three scores in each component will be added together.

6003.1.1 In a 3 or fewer judge format, no score of each component will be discarded.

6003.2.3 Total Score

The total Judges' Score is calculated by adding the five component totals from

6003.1 (for 5 judges), or the three judges total from 6003.1.1 (for 3 judges). This total is then multiplied by the appropriate Degree of Difficulty (DD) factor to determine the total score for each jump. The total will be truncated to two decimal places.

In a two jump Phase, the competitor's final score for both jumps is determined by adding together the total scores from each jump.

6004 Judging Criteria

6004.1 Air (20% of the Score) Min = 0.0 / Max = 2.0

Air shall be evaluated based upon the take-off, height and distance of the competitor's jump. Take-off involves an evaluation of how the jump is initiated. Height and distance are essentially a product of speed into the jump and the force of the take-off. Take-off, height and distance shall also be evaluated in relation to the length and steepness of the landing hill. The competitor should not land too short (knoll) or too long (beyond the transition area of the landing hill).

Air consists of 20% of the score (maximum 2 points per judge) and will be broken down into two parts:

0% Technical Take-Off

10% Height and Distance

6004.1.1 Take-Off Min = 0.0 / Max = 1.0

Take-off refers to the manner in which the competitor initiates the jump by extending the body at the right moment. It is the action of the jumper as he/she leaves the jump. Take-off is judged from the moment the competitor enters the transition, until the skis leave the kicker.

6004.1.1.1 Good Take-Off Min = 0.7 / Max = 1.0

Just before the competitor leaves the kicker the body must be fully extended – the arms must lead the motion. The jump is initiated through “popping” from the kicker. The actual position in the jump (tuck, twist, spread, etc.) should not begin before the skis have left the kicker.

6004.1.1.1.1 Back flip(s)

As the jumper's boots are on the end of the kicker the body should form a perpendicular line to the skis. The feet, knees, hips, and shoulders should all be in that line. They can accomplish this take-off position by using a traditional arm swing or by a pre-set. In an arm swing the arms lift in front of the body by leading the motion of the rest of the body and they follow the curve of the kicker. There is a timing element to an arm swing. In a pre set take-off the perpendicular body line to the skis is accomplished prior to the start of the jump eliminating the timing element. In both take-offs the jumper must withstand the force of the jump accomplishing a perpendicular position as the ski boots leave the jump, i.e.

Single Kicker – take-off angle 50° - skis 50° - body line (perpendicular) 140°

Double Kicker – take-off angle 65° - skis 65° - body line (perpendicular) 155°

Triple Kicker – take-off angle 70° - skis 70° - body line (perpendicular) 160°

The actual position in the jump (tuck, twist, pike, etc.) should not begin before the skis have left the kicker.

6004.1.1.1.2 Front Flip(s)

As the jumper's boots are on the end of the kicker the body should form a perpendicular line to the skis up to the hips. The feet, knees, and hips should be in line. The upper body from the hips to the shoulders and arms should be in line. The upper body from the hips to the shoulders and arms should be at an angle that is continuing the curve of the kicker. It will appear to be a slightly piked body

position. The arms must lead the body's motion. The actual position in the jump (tuck, twist, pike, etc.) should not begin before the skis have left the kicker.

6004.1.1.1.3 Side Flip(s)

The jumper should extend directly upwards with the lower body at the end of the jump, with the shoulders executing a sideways rotation.

6004.1.1.1.4 Switch

The jumper's lower body should be fully extended at the end of the jump, with the upper body executing his/her intended rotation or maneuver.

6004.1.1.1.5 Off Axis

The jumper's lower body should be fully extended at the end of the jump, with the upper body executing his/her intended rotation or maneuver.

6004.1.1.2 Average Take-Off 0.4 - 0.6

There are different types of mistakes: For upright, spins, and off axis jumps the competitor does not pop at the right moment (too early or too late), the form starts too early (twisting on the kicker), i.e. the arms are behind the body; hips are pushed forward too much; the competitor throws his arms over his head causing an uncontrolled rotation (sling).

For Back Flips the body line is past perpendicular to the skis and take-off angle creating too much rotation "sling". Or the body line is forward of perpendicular to the skis and take-off angle creating too little rotation "stuff".

Another scenario may be that the knees slightly bent which puts the hips past perpendicular to the skis and take-off angle (weight back) and the chest and arm forward of perpendicular to the skis and take-off angle (weight forward). This is not a "sling" or a "stuffed" take-off however it will produce a poor air trajectory that resembles a flatter arc not following the angle that is continuing the curve of the kicker (see 6004.1.2.1 Good Height and Distance). This is referred to as a "soft" or "buckled" take-off. For all jumps when the maneuver starts too early (twisting on the kicker), points will be deducted. Points are deducted according to the number and severity of the mistakes.

6004.1.1.3 Below Average Take-Off 0.0 - 0.3

Take-off is completely missed, causing an uncontrolled jump in most cases.

6004.1.2 Height and Distance Min = 0.0 / Max = 1.0

Height and distance is a product of speed into the jump and the force of the take-off. It shall be evaluated according to the trajectory through the air and the landing point of the jump.

6004.1.2.1 Good Height and Distance 0.7 - 1.0

The trajectory through the air begins at an angle that is continuing the curve of the kicker. The optimum landing point should be as far down the landing hill as the jump is away from the knoll, or appropriate to the jump performed. Jumps landed further down may receive full points if they are landed before the transition of the landing hill into the outrun.

6004.1.2.2 Average Height and Distance 0.4 - 0.6

The trajectory through the air is too high or too low. The landing is in the transition area from the knoll to the optimum landing point.

6004.1.2.3 Bad Height and Distance 0.0 - 0.3

The jump is landed on the knoll or on the outrun.

6004.2 Form (50% of the Score) Min = 0.0 / Max = 5.0

Form consists of 50% of the score (maximum 5 points per judge).

Form denotes the position of the body, skis, arms, hands, and/or poles while in the

air. It is the manner in which the competitor executes each maneuver. Form shall be evaluated based upon competitor's precision of performance (i.e. tightness of body, economy of motion), balance, mechanics, stability in the air, and the timing of the maneuver in relation to the apex of the jump. Form is judged from when the competitors ski tips start to leave the jump until the competitor touches the snow.

6004.2.1 Positions in the Form

6004.2.1.1 If the number of planned maneuvers is not fulfilled (somersaults, twists, 360's, upright positions) resulting in too many or not enough maneuvers, the judges will provide a score and jump code for the maneuver they witnessed. They will receive a DNF if the unplanned maneuver is a repeat of his/her secondary maneuver.

6004.2.1.2 A judge breaks down the form points to the number of maneuvers (somersaults, 360's, twists, upright positions), and takes off the percentage accordingly if the form in one, two, three, or more parts is missed completely or partially.

6004.2.2 Form Breaks

The following is a guide to use when assessing form breaks:

Minor form breaks	up to 25% of possible form points
Medium form breaks	up to 50% of possible form points
Major form breaks	up to 100% of possible form points

As in take-off, the body should be extended, not only at take-off, but also prior to landing. The amount of deduction depends on whether the form is bad throughout the whole jump or only in parts of the maneuver.

i.e. jumps performed with a minor form break in one somersault:

	Single Twist	Double Twist	Triple Twist
Form	5.0	2.5 2.5	1.7 1.7 1.6
Deduction	1.2	0.6	0.4
Total	3.8	4.4	4.6

A guideline to differentiate between minor, medium and major form breaks is as follows:

All definitions of form are based on body positions. All positions have to be in the layout (straight body no bending 0°), or tuck or pike (90° bending at knees, hip) position. The only exception is the puck position (only allowed for half-in and twisting front flips).

Anything with a variation of less than 45° off the required position should be considered minor. Anything with a variation of approximately 45° off the required position should be considered medium. Anything with a variation of clearly more than 45° off the required position should be considered major.

Deductions are cumulative. Multiple minor form breaks in the same movement can result in a major form break..

6004.3 Landing (30% of the Score) Min = 0.0 / Max = 3.0

A proper landing involves a balanced, stable and controlled body position throughout. The competitor should demonstrate precision and grace with minimal interruption upon contact with the landing surface. Absorption should be made primarily with the knees and lower body with only a slight bend at the waist. The evaluation of a landing starts immediately when the competitor touches the snow and continues until the competitor has exhibited and shown sufficient skiing control after landing.

Landing consists of 30% of the total score (maximum 3.0 points per landing judge).

Landing consists of two parts

1) Landing - body position in relation to the landing hill following preparation for landing, ski snow contact on impact as well as absorption of the body - Max 2.0 points

2) Exit from the landing following the snow contact, impact and absorption. - Max points 1.0

(Preparation for landing - this is considered in form)

6004.3.1 Landing Min = 0.0 / Max = 2.0

6004.3.1.1 Applicable Ranges for landing

2.0 Body is extended and 90° to the landing hill, perfect balance, weight on center of skis and rotation is completely stopped.

1.6 - 1.9 Slightly over rotated or under rotated, good absorption and balanced body position, weight on skis. No touch.

1.2 - 1.5 Over or under rotated, hard absorption, slightly off axis, possible small touch down with hand(s).

0.8 - 1.1 45° to the landing hill, way too long or too short. Hard hand touch down/ dragging hands.

0.4 - 0.7 Way too long or too short, insufficient absorption, touch down, back slap.

0.1 - 0.3 So far over or under rotated that there is minimal weight on the skis when they touch the snow, major snow contact.

0.0 Complete fall with no weight on skis at all.

6004.3.2 Exit in = 0.0 / Max = 1.0

6004.3.2.1 Applicable Ranges for exit

1.0 Full Control, no touch down, weight on both skis, exiting straight from landing.

0.7 - 0.9 Slightly off balance or off axis, no touch down.

0.4 - 0.6 Continuing rotation, unstable, unbalanced or off axis, after landing then a touch down, continuing into exit with skis.

0.1 - 0.3 Sliding down sideways or straight on back, belly, or circling virtually no continuation.

0.0 No control, no continuation into exit or loss of both skis.

6004.3.3 Note: A competitor must receive at least 0.1 points in the landing category to receive any point in the exit category.

6005 General Description of Aerial Maneuvers

6005.1 Spread Eagle: After take-off the outstretched arms and legs are extended out to the sides away from the body. The legs should be spread to form a minimal angle of 90° when viewed from the front. The skis should be parallel to each other (tails and tips equally spread) and 90° to the body. The upper body should remain straight and upright without any noticeable forward bend at the waist.

6005.3 Twister: The skis are twisted a minimum of 90° to the fall line. The skis should remain parallel to each other, together and 90° to the body. The hands and arms may move to counter the twisting of the skis.

6005.4 Daffy: After take-off, one leg should be brought up and forward while the other leg is simultaneously brought backwards and up, resulting in a 180° split position in which the front ski is parallel to the back ski, skis pointing straight up and down.

6005.5 Back Scratcher. The skis tails are brought back and up to a minimum angle of 90° to the horizontal when viewed from the side, knees bent, hips forward and a slight backwards counter motion of the upper body (shoulders). Legs must be together

and skis parallel.

- 6005.6 Mule Kick: The Mule Kick is a Back Scratcher with a 45° twist of the hip to the side.
- 6005.7 Iron Cross: This is a combination of the back scratcher and the tip cross. The skis are crossed in a 90° angle while pointed to the ground at a 90° angle. The maneuver is held with the upper body in the neutral position until the skis are extended to the landing hill
- 6005.8 Kosak: A Kosak is a combination of a Spread Eagle and a Pike. Arms can be held in different ways; in front, between the skis, at the side, or a competitor may grab the ski tips. Legs are simultaneously raised and spread in front and to the side of the body. Legs should approach the horizontal level and upper body is brought forward to counter inertial forces of legs being raised. Skis should achieve a vertical position and be symmetrical.
- 6005.9 Helicopter: The Helicopter is a 360° revolution of the body on a vertical axis.
- 6005.10 Front Somersault: A complete forward rotation in which a person rotates heels over head.
- 6005.11 Back Somersault: A complete backward rotation in which a person rotates heels over head.
- 6005.12 Side Somersault or Lincoln Loop: A complete rotation around the yawl axis in which a person rotates heels over head.
- 6005.13 Tuck: A position in which the knees are brought up towards the chest to a 90° angle at the hips and 90° angle at the knees. Hands are placed on knees or legs. In back somersaults 90° is ideal; in front somersaults more than 90 may be reached.
- 6005.14 Pike: A position where the upper body is bent 90° at the waist with legs remaining essentially straight.
- 6005.15 Layout: The body is extended straight.
- 6005.16 Half Twist: A 180° rotation of the body around its vertical axis in a “free” position, except in the half out movement the body must be layed out.
- 6005.17 Twist: All twists (including multiple twists in one somersault) have to be performed in a layout position, except for multiple front somersaults where the “free” position will be allowed.
- 6005.18 Multiple Maneuvers: Any combination or combinations of the above maneuvers. These must exhibit the full requirements of each of the individual maneuvers included in the combination. For multiple uprights the body must pass through the standard upright position (legs straight and together, skis parallel) before performing the next maneuver.
- 6005.19 Free Position: A maneuver performed in the puck, pike, tuck or layout position.
- 6005.20 Puck Position: The body is in an open tuck position; the hands do not have to touch the knees, minimum of a 45° angle, at hips and knees.
- 6005.21 Mute Grab: is when the skier’s hand grabs across the front to the outside edge of the opposite ski. A Mute Grab is usually done with skis crossed as in an Iron Cross. The ski that is crossed over the top is grabbed in front of the binding’s toe piece. The fingers reach over the top-sheet of the ski and hook the outside edge.
- 6005.22 Off-Axis Rotation: A complete rotation in which a person rotates around the vertical axis where the axis is tipped between 45° and 135°. Could be incorporated with any number of rotations. (Sometimes informally called a ‘Misty’ for an off-axis front roll and a ‘Rodeo’ for an off-axis back roll.
- 6005.23 A Neutral is a straight pop (often referred to as a “T Set”) jump. No trick is performed. A well executed Neutral will include the following characteristics: the athlete pops off of the jump creating increased height of trajectory, the athletes

body is fully extended and straight, skis are matched at a 90 degree angle to the body, the athlete is well balanced and controlled in the air, the arms are extended out to the side of the body, facing slightly down the hill in a slight V position. A neutral may not be combined with any other tricks. It must stand alone as a single maneuver.

6006 Degree of Difficulty Chart and Multipliers

6006.1 Calculation of Degree of Difficulty

Base Degree of Difficulty (DD) for Jumps=1.50

Any possible combination of the below offered tricks may be combined to form a maneuver in a single jump with the consequent DD to be added the base.

6006.1.1	Uprights (may be added to any following categories)	DD	Code
	Neutral (may not be added to any following categories)	0.06	N
	Tuck	0.08	Tk
	Pike	0.08	Pk
	Kosak	0.12	K
	Mule Kick	0.12	M
	Spread Eagle	0.10	S
	Daffy	0.12	D
	Twister	0.10	T
	Back Scratcher	0.12	Y
	Iron Cross or Leg Cross/Uncross	0.12	X
	Grab	0.13	G
	2-Hand Grab	0.18	dG
	Switch (each time, only one per takeoff and/or landing)	0.10	-
6006.1.2	Rotations	DD	Code
	Zero Spin (switch straight air)	0.01	0
	180	0.14	1
	360 (Helicopter)	0.28	3
	540	0.42	5
	720	0.56	7
	900	0.70	9
	1080	0.84	10
	1260	0.98	12
	1440	1.12	14
	1620	1.26	16
	1800	1.40	18
	Off Axis (bonus may follow any of the above rotations)	0.20	o
	Double Off Axis bonus	0.45	oo
	Triple Off Axis bonus	0.80	ooo
	Right spin direction		r
6006.1.3	Somersaults	Back	Front & Side
	Jump Description	DD	DD Code
		b.. (back)	f.. (front)
			l.. (loop/side)
	Single flip	0.55	0.60 L
	Double flip	1.15	1.30 LL

Triple flip	1.80	2.10	LLL
Quad flip	2.50	3.0	LLLL
Tuck	- 0.05	- 0.10	Tk
Pike	- 0.05	- 0.10	Pk
Half twist	0.125	0.15	H
Full twist	0.25	0.30	F
1 ½ twist (Rudy)	0.45	0.55	Ru
Double twist	0.65	0.80	dF
2 ½ twist (Randy)	0.85	1.05	Ra
Triple twist	1.05	1.30	tF
3 ½ twist (Adolf)	1.25	1.55	Rz
Quad twist	1.45	1.80	qF

All somersaults will be based and scored as a Layout

Special Provisions:

Maneuvers may be announced and performed in a position (Tuck, Pike, Pucked or “free”), in which case, a factored deduction applies and will be designated by a “P” replacing the “L” in straight over somersaults (example b P instead of b L) or by a “p” after the letter designating the twist (examples b HpH or f FpFp).

6007 DNF/Rerun

If a jump is performed that is the same as the first jump the score is DNF. Refer to section 6008 for information regarding which jumps are considered to be different. Rerun granted for loss of ski(s) after takeoff and before landing, see Rules 3057.1.14 and 3058.1. Only one rerun granted for loss of ski(s) for each round. If the rerun is not used the score will be DNF. Loss of ski(s) during or after landing shall be evaluated by the judges in accordance with the judging criteria.

6008 Definition of Different Jumps

A competitor shall be required to perform two different aerial jumps. If two jumps are the same, only the first jump counts.

6008.1 Two jumps are different if any of the following are true:

- 1) They have a different orientation to the axis of the spin. (Off axis versus horizontal axis versus vertical axis). Or contain a rotational difference of 180 degrees or more.
- 2) For off axis, upright and inverted jumps with a single flip, 360 rotation, or less.
 - a) The jump code is different.
- 3) For off axis, upright, and inverted jumps with greater than a single flip, or rotation greater than 360.
 - a) They have a different take-off or landing direction (-)

- b) They have different direction of rotation (b, f, l, r)
- c) They have a different number of half rotations or half twists (horizontal or off axis).

6008.2 Special Provisions for Somersaults

A Layout is different from a flip with position.

6009 Tie Breaking

In Aerials should a tie occur, the scores from all jumps performed in that round by each tied competitor shall be recalculated without the application of DD, and the resulting values used to break the tie. If any competitors are still tied, the one with the higher Air/Form score shall be ranked higher; if still tied, the competitor with the lower total DD from all jumps in the round shall be ranked higher; if still tied and the round consists of more than one jump, the competitor with the lowest single DD of any jump in that round shall be ranked higher.

6010 Practice of Jumps

Competitors must perform in the official competition training period of each event the most difficult (highest DD) type of jump they will perform in that competition from any category. i.e. Back, Front or upright.

6200 MOGULS

6201 Definition

Moguls competition shall consist of one run of free skiing on a steep, heavily moguled course, stressing technical turns, aerial maneuvers and speed. See 3060.2 concerning Semi-Finals and Finals.

6202 Scoring

6202.1 Turns; Consisting of 60% of the score.

6202.2 Air; Consisting of 20% of the score.

6202.3 Speed; Consisting of 20% of the score.

6203 Scoring Procedures

6203.1 7 Judge Format

The judges will evaluate the competitor's performance using a split scoring system as follows:

6203.1.1 Turn Judges

Five judges shall independently evaluate the competitor's performance based upon the criteria as stated in 6204.1. First, remove the highest and lowest judge's base scores, and add the other judges' base scores to give a base total. Second, remove the highest and lowest judges' deduction scores, and add the other judges' deduction scores to give a deduction total. Finally, take the base total and subtract the deduction total to give the final Judges' total. The total Turns and Landing score must not be less than 0.1.

6203.1.2 Air Judges

Each judge shall give 0.0 to 10.0 for each of two jumps. For each jump, the judge's score is multiplied by the jump's DD (see 6204.2.1.2). The scores will be averaged for a total score and truncated to two decimal places. Total Air Score = 10.0 (Max) x 2 jumps = 20.00 (Max) per run.

6203.1.3 Total Score

The average of the two air scores is added to the total of the three counting turn scores to get the competitors total judges score. The speed score, as calculated in 6204.3 shall be added to the total judges score to determine the competitor's complete moguls score.

6203.2 5 Judge Format

The judges will evaluate the competitor's performance using a split scoring system as follows:

6203.2.1 Turn Judges

Three judges shall independently evaluate the competitor's performance based upon the criteria as stated in 6204.1. The three scores shall be added together. The score for each judge must not be less than 0.1.

6203.2.2 Air Judges - See 6203.1.2

6203.2.3 Total Score

The average of the two air scores is added to the total of the three counting turn scores to get the competitors total judges score. The speed score, as calculated in 6204.3 shall be added to the total judges score to determine the competitor's complete moguls score.

6204 Judging Criteria

6204.1 Turns (60% of the Score) Min = 0.1 / Max = 20.0

Turns, as judging criteria refer to a technical evaluation of how well a competitor turns through the moguls. Turns, in a moguls event, refer to rhythmic changes in direction of travel to either side of the fall line, utilizing an aggressive, controlled technique. The competitor shall be judged from the start until the run is completed by crossing the finish line, stopping for more than 10 seconds or losing both skis. Any imbalance or problems inside the course resulting in a fall or touch after the finish line will result in deductions only for those errors which occur before the finish line. The finish line is part of the course. Nothing occurring after the finish line shall affect the judges evaluation of the run.

6204.1.1 There are Four Points to Consider

6204.1.1.1 Fall Line

Skiing in the fall line is considered the shortest way from the start to the finish. To achieve the maximum points for fall line the competitor should stay in the selected fall line out of the start gate.

6204.1.1.2 Carving

6204.1.1.2.1 General

A pure carved turn is one in which the tail of the ski follows precisely the track made by the ski tip. The upper ski is edged inward at the entrance to the turn, with the skier's weight placed well forward on that ski. This maneuver flexes the ski into a curve whose radius is determined by the angulation of the ski, by its side cut and by the size of the bending moment acting on the ski. The other ski needs to move in the same fashion to produce a similar curve with the weight on its outer edge. Reverse camber of the ski (flex) can also be increased by flexion of the edged ski tip into the face of the mogul or rut. As shown in the figure below, in a purely carved turn there is no skidding/lateral sliding, and the only snow resistance present is the very small gliding friction between ski base, edge and snow. As a result of this minimal level of friction between ski and snow, the speed reduction of the skier is optimized and fully under the control of the skier. Turn radius should reflect the deflection required in relation to the gradient of the slope. Excessive deflection across the hill impacting the face of a mogul is a form break as it results in excessive braking and poor ski line. Turn shape and deflection should vary according to the spacing between the moguls.

6204.1.1.2.2 Body Position for Carved Turns

- A properly carved ski requires less effort to work, and gives higher levels of

control and stability.

- The turn is initiated with pressure as the knees and ankles/feet roll the skis onto edge and extension begins.
- At the middle of the turn (when the ski is edged and the tip is pointing down the fall-line) the ski tips contact the face of the mogul.
- Absorption is used to maintain balance and control pressure in the skis and should match the shape and size of mogul to optimize snow to ski contact.
- Rotations in the upper legs are minimal, feet remain under the body (shoulders and hips) in both fore-and-aft and lateral planes, and knees remain flexed.
- Legs should be together or in a consistent position throughout the run.
- Breaks in balance and separations in position are inefficient turns.
- Angulation of the lower leg controls the radius of the turn. Timing of the initiation dictates how deep the feet go into the rut.
- Movements should be symmetrical and equal side to side, specifically:
- Timing and placement of pole plants (double pole plant is a deduction)
- Arm movements (little movement is preferred but if there is movement it should be equal)
- Shape of turns: do the turns adjust to the gradient of the slope and the size and disposition of the moguls?
- Position of the feet in relation to the body: do the feet move further outside the body's midpoint on one turn?

6204.1.1.2.3 Illustrations / References

Illustration of a purely carved turn Illustration of a skidded turn by contrast, the figure below illustrates a turn that is executed while skidding or sliding laterally. The path "swept" by the skis is the result of plowing the base of the skis through the snow at the face of the mogul. This happens when the skier turns his skis too sharply into the turn and the ski impacts the face of the mogul on the sidewall and base of the ski, as opposed to the tip of the ski on edge. A skidding ski pivots across the path of the turn. However, in some cases, a degree of steering or skidding during initiation is unavoidable, but the key is to minimize snow resistance from skidding during the remainder of the turn. This is in order to maintain correct speed control and balance during an accurate carved turn.

6204.1.1.2.4 Other deductions

Deduction in turns points are for specific errors on the course.

Deductions will also be used for deviations from a fall line as noted below:

Fall line deviations (leaving the fall line) are based on the guidelines of a 1.6 for any complete line deviation. Other deductions may be taken for factors that caused the line deviation. Fall line deviations may be more or less than a complete line change and will be scored accordingly. A skier who returns to a fall line after deviating will NOT receive a deduction for a second line deviation.

6204.1.1.3 Absorption and Extension

The skier should follow the shape of the moguls through absorption from the start until the top of the mogul. Extension starts right after the top of the mogul. Extension also follows the shape of the mogul. Pressure between skis and snow should remain the same during the absorption and extension, absorbing as the ski moves up and extending as the skier moves down. Additionally, the skier should aggressively utilize the moguls to assist initiation of turns rather than waiting for the moguls.

6204.1.1.4 Upper Body

The head should remain still, facing downhill. The chest should also stay straight and natural. Hands stay in front of the body in a natural position. Pole plants should be light and wrist movement goes forward.

6204.1.2 Moguls point guideline

Excellent	18.1 – 20.0
Very good	16.1 – 18.0
Good	14.1 – 16.0
Above Average	12.1 – 14.0
Competent	10.1 – 12.0
Below average	8.1 – 10.0
Poor	4.1 – 8.0
Very poor	0.1 – 4.0
Not skied	0.0 - DNF/DNS

6204.1.3 At a course with 9 control gates (each control gate counts 1/10 of the course) it is recommended to reduce the Turn score by 2.0 for each section a competitor has complete loss of control or does not ski.

6204.2 Air (20% of the Score) Min = 0.0 / Max = 10.0 (per jump)

6204.2.1 The scoring of air is broken into two parts, Air and Difficulty. The maneuver will be evaluated for form out of 10.0 with a degree of difficulty multiplier, based on the maneuvers(s) performed. See 6204.2.1.2

6204.2.1.1 Form

Priorities to judge form and position of the jumps in moguls skiing are set as follows:

First Quality (Form, Landing)

Second Air (Height and Distance)

Third Spontaneity: Spontaneity is the ability of the competitor to maintain the rhythm of turns prior to the jump, including the initiation of takeoff.

Note: Air in moguls will be judged until the skier is in full control.

When judging form for all jump groups (uprights, flips, off-axis, etc.) the primary factor for evaluation is the “Purposeful Motion” utilized by the competitor.

Purposeful motion means:

- athleticism displayed
- control
- balance, and
- continuity of motion.

All jumps, including traditional jumps (such as uprights and vertical axis rotations) and new jumps (such as off-axis rotations), will be evaluated using the Purposeful Movement criteria.

For example: the prior criteria for a twister-spread required that specific positions be reached (reference 90°). The new criteria will reward an athlete who performs maneuvers that have the same amount of completion (both the twister and spread to 90°, for example) under the Continuity of Motion criteria; precise separation between the twister and the spread will be rewarded under the Control criteria; smooth motion, axis, and steady arm positions with the Balance criteria; and extension, or amplitude of positions achieved under the Athleticism criteria.

Maximum raw point allotment: 10.0 per jump.

Note: Jumps must receive at least 0.1 form points to receive difficulty multiplier.

The height of the jumps should be related to the weight point of the body (not to

the head, or top or body).

POINT GUIDELINE

Excellent Jump	8.1 – 10.0
Good Jump	6.1 – 8.0
Average Jump	4.1 – 6.0
Poor Jump	2.1 – 4.0
Very Poor Jump	0.1 – 2.0

6204.2.1.2 Jump codes, values and degree of difficulty will be posted in the freestyle/freeskiing section of usskiandsnowboard.org. U.S. Ski & Snowboard and FIS use the same DD chart with the exception of the Neutral, which is a straight upright over jump, without a trick, for a value of 0.36/0.46. A second exception is the Grab (G) as a standalone jump, which has values of 0.5 for men and 0.6 for women.

6204.2.2 Identical jumps performed within a mogul and dual mogul run shall be considered repeated jumps, as determined by the judges. Once determined if jumps are repeated, only the higher scoring of the 2 will count.

6204.2.3 Full control must be gained after every jump, resulting in controlled turns. If a competitor loses a ski while performing a jump in moguls, the jump shall receive no credit.

If a competitor jumps over the light beam at the finish line he will not receive any time points. If a competitor lands a jump with the ski boot(s) on or before the finish line the jump is counted.

6204.2.4 Falls After Jumps

- The jump is judged up to a safe, controlled landing.
- If the landing is missed the jump score is affected.
- Falls and touch downs also affect the turn score.

6204.3 Speed (20% of the Score) Min = 0.0 / Max = 20.0

Speed is simply the amount of time taken to complete the run. Time shall be taken from the moment that the competitor leaves the starting gate until they cross the finish line. The points awarded for speed will be called time points and calculated with the following procedure:

6204.3.1 Pace Time

The Pace time for the moguls is 8.2 m/sec for women and 9.7 m/sec for men. To calculate the Pace Time for a specific course, take the length of the course in meters and divide by the Pace Time in m/sec.

6204.3.2 Speed Calculation (same for any number of judges)

Speed points will be based upon the FIS speed formula:

$$\text{Time Points} = 48.00 - 32.00 \times (\text{Competitor's Time} / \text{Pace Set Time})$$

It is calculated to two decimal places. It cannot be less than 0.00 points or more than 20.00 points. Tying the pace set results in 16 points.

6204.4 Deductions

6204.4.1 Deduction of Turn Score

The “Deductions” category is only for deductions of falls, complete stops and interruptions/sliding where downhill momentum is significantly slowed down. All other errors in the run should be reflected in the “Turns” category.

“Stumbles” that do not involve stops or falls and “Interruption/sliding” that does not involve significant reduction in downhill momentum are not considered in the Deductions category. They are considered when awarding Turns points.

6.0 Any complete stop

4.1-5.9 Complete fall without stop or interruption/significant sliding down fall line or across hill to nearly a complete stop

3.1-4.0 Hard touch down or front roll without stop or interruption/sliding significantly reducing down hill momentum

2.1-3.0 Medium touch down without stop

0.1-2.0 Light touch down without interruption

Definitions

- Light touch down: Momentary touch with one or both hands.
- Medium touch down: Touch with hips or arm(s).
- Hard touch down: Back or side slap, or front roll.
- Complete fall: Full body contact, no weight on skis.
- 1 Complete stop: A complete stop for any reason.

Notes

1) A competitor loses control and rides the tails of her/his skis with no turns for two full control gates. (Deduction = 4.0 (2.0 x control gates for shooting))

2) A competitor loses his balance after a jump and does a back slap then immediately continues skiing with no fall line break. (Deduction = 2.9 – 4.0)

3) A competitor has a complete fall and slides two control gates then comes to a full stop, and then continues skiing. (Deduction = 5.3 + 6.0 + 4.0 (2.0 x control gates for not skiing))

6204.5 Tie-Breaking Single Moguls Format

Should a tie occur, the competitor with the better Turns score shall receive the better rank; if still tied, the competitor with the better Air score without DD shall receive the better rank; if still tied the faster time shall receive the better rank; if still tied, the tie shall remain unbroken.

6205 Special Procedures: Moguls

6205.1 Loss of Ski(s) and Stops

If a competitor loses a ski before the finish line she/he may finish on one ski. The competitor will be judged according to his/her performance. If the competitor does not continue the run and fails to put his/her ski back on in a 10 second time limit, they will be judged up to that point (0 time points). If a competitor loses both skis, they will be judged up to that point (0 time points). If a competitor stops in the moguls course for more than 10 seconds, the competitor will be scored to that point (there are no time points). The competitor should exit the course as soon as possible.

6205.2 Number of Aerial Maneuvers

All courses will be two jump courses for international competitions. The recommended number of aerial maneuvers shall not restrict the competitor to the stated amount, but represents the number of aerial maneuvers that will receive evaluation. For example, if the Jury recommends two aerial maneuvers, a competitor who performs only one maneuver can only receive a maximum of 50% of the total possible aerial score. Maneuvers in excess of the recommended amount will be disregarded in order of lowest to the highest scoring. If a jump is repeated the best one will count. For example, if two aerial maneuvers are recommended and a competitor performs three maneuvers, the judges will score the best two different maneuvers.

However, a competitor should be careful not to perform aerial maneuvers in such excess that the Judge's score for turns are negatively affected.

6300 DUAL MOGULS

6301 Definition

The dual moguls competition shall consist of elimination rounds where pairs of competitors compete against each other. Each loser is eliminated and each winner advances to the next round until a final result is achieved. The competition will take place on a steep, heavily moguled course, stressing technical turns, aerial maneuvers and speed.

6302 Pairings

Refer to section 4305.

6303 Scoring Procedures

In dual moguls Format, each judge shall determine which competitor more fully exhibits the requirements set forth in Rule 6204, Judging Criteria for Moguls, and indicate such selection by the dual moguls system, corresponding to the course on which such competitor competed.

The loser shall be eliminated and the winners move on to the next round until the final placing is determined. See Rule 6304 for additional event procedures.

6304 Judging Procedure, Dual Moguls Format

6304.1 Dual Moguls

The judging criteria used in the dual moguls elimination format shall be the same as set forth in Rule 6204.1 "Turns" and Rule 6204.2 and 6305.4 "Air". Speed is a comparison of relative time as per rule 6304.2.3

6304.1.1 Five Judges Format

A panel of five judges shall administer scores based upon specific duties for each judge as follows:

AIR								- One Judge
SPEED								- One Judge
TURNES								- Two Judges
OVERALL PERFORMANCE								- One Judge
J1	J2	J3	J4	J5				
Turns	Turns	Speed	Air	Overall				

Speed is a comparison of relative time as per rule 6304.2.3

6304.1.2 Seven Judge Format

A panel of seven judges shall administer scores based upon specific duties for each judge as follows:

AIR								- Two Judges
SPEED								- One Judge
TURNES								- Four Judges
J1	J2	J3	J4	J5	J6	J7		
Turns	Turns	Turns	Turns	Air	Air	Speed		

Speed is a comparison of relative time as per rule 6304.2.3

6304.2 Dual Moguls System

In the dual moguls system, each judge has a set of paddles or cards that remain out of view until the Head Judge announces "judges are ready to vote". Then each judge raises the paddle or cards chosen keeping it clearly visible for the competitors, spectators, announcers and scorekeepers to see, until the Head Judge announces the command 'paddles down'.

The paddles or cards should be round with a diameter of approximately 25 cm. The cards or paddles are to be marked in a pie-format in the correct proportions

(5-0, 4-1, 3-2, 2-3, 1-4, 0-5) painted in colors red and/or blue, on both sides, corresponding to the voting possibilities of the judges. On the scaffolding in front of the respective judges, boards have to be placed showing the judges scoring responsibility (T-turns, A-air, S-speed, O-overall)

6304.2.1 Scoring

Each judge will have a total of five possible votes to cast, with possible combinations of 5-0, 4-1, 3-2, 2-3, 1-4, or 0-5, for the red course vs. the blue course. This results in 25 or 35 possible votes to be cast as follows:

7 Judges	5 Judges
Turns #1: 5 votes	Turns #1 5 votes
Turns #2: 5 votes	Turns #2 5 votes
Turns #3: 5 votes	Air 5 votes
Turns #4: 5 votes	Speed 5 votes
Air #1: 5 votes	Overall 3 votes Turns
Air #2: 5 votes	1 vote air, 1 vote speed
Speed: 5 votes	
Total: 35 votes	25 votes

A scorekeeper will be on the Judge's stand assisting the Head Judge to add up all the votes. The result will be written in the protocol and announced immediately. The winner of each match will be the competitor who received the simple majority of votes.

The scorekeeper is also responsible to note all decisions of each judge on a protocol form.

6304.2.1.1 Tie Breaking Dual Mogul Format

Should a tie occur, the competitor with the greater number of votes from the turns judges shall be ranked higher; if still tied, the competitor with greater number of Turns judges in favor shall be ranked higher; if still tied, the Turns Tie Break Judge's score shall determine the result.

6304.2.2 In case there is a tie for the last place qualifying for dual moguls finals, the following will apply: If two people are tied (8th place in women or 16th place in men) the two will dual immediately before the first dual round. The winner will advance to the first dual round. If more than two people are tied, i.e. a three-way tie for 8th place of the women, each will ski a single run with the winner advancing to the duals.

6304.2.3 Timing

Electronic timing has to be used at all events. Timing systems should be mounted at the finish of both courses so that the time difference between the competitors can be calculated. Judging points will be awarded as follows:

- Both competitors are within 0.74 seconds = 3/2
- The time difference is between 0.75 and 1.49 seconds: = 4/1
- The time difference is equal to or greater than 1.5 seconds: = 5/0

6304.2.3.1 Procedures for a tie in time differential

In the case of a tie in time (a differential of 0.00 seconds), the following procedure is followed for a 5-Judge panel:

- The speed judge withholds all 5 of his points (i.e. zero points awarded).
- The overall judge withholds his 1 speed point and awards his other 4 points (3 Turn points and 1 Air point).
- The result is 19 total points and a tie for the heat if not possible.

6305 Special Procedures: Dual Moguls

6305.1 Loss of Ski(s) and Stops

If a competitor loses a ski before the finish line he may finish on one ski. The competitor will be judged according to his/her performance. If the competitor does not continue the run and fails to put his/her ski back on in a 10 second time limit, they will be judged up to that point (0 time points). If a competitor loses both skis, they will be judged up to that point (0 time points). If a competitor stops in the moguls course for more than 10 seconds, the competitor will be scored to that point (there are no time points). The competitor should exit the course as soon as possible.

6305.2 Number of Aerial Maneuvers

All courses will be two jump courses for international competitions. The recommended number of aerial maneuvers shall not restrict the competitor to the stated amount, but represents the number of aerial maneuvers that will receive evaluation. For example, if the Jury recommends two aerial maneuvers, a competitor who performs only one maneuver can only receive a maximum of 50% of the total possible aerial score. Maneuvers in excess of the recommended amount will be disregarded in order of lowest to the highest scoring. If a jump is repeated the best one will count. For example, if two aerial maneuvers are recommended and a competitor performs three maneuvers, the judges will score the best two different maneuvers. However, a competitor should be careful not to perform aerial maneuvers in such excess that the Judge's score for turns are negatively affected.

6305.4 Scoring Air in Dual Moguls.

6305.4.1 Air judges evaluate jumps based on the scoring criteria from single moguls (quality, air and spontaneity), as well as difficulty and variety. Competitors may repeat jumps but judges will consider variety in comparing the two competitors. Variety reflects a different number of maneuvers and different types of maneuvers.

6306 Ranking and Tie Breaking of those eliminated in Dual Moguls knock-out rounds

6306.1 In each round, the scores will be compared between all of the eliminated competitors. The competitors' scores will be sorted from the highest to lowest scores. Competitors with the higher score will be grouped, followed by the next highest score until all competitors are classified. Competitors within each group will then be ranked according to their seeding in the competition, and all will be ranked above those from the same round who did not receive a score.

6306.2 Competitors who DNF will be ranked according to their seeding or qualification rank, below all competitors from the same round who received a score and above all those who DNS in the same round.

6306.3 Competitors who DNS in any round except the first round of Dual Moguls with Seeded Groups will be ranked according to their seeding or qualification rank, after all other classified competitors in the same round.

6306.4 Competitors who DNS in the first round of Dual Moguls with Seeded Groups will not be classified and will have no rank in the competition. They shall be listed on the Results above who are DSQ.

6306.5 In the case where both competitors are DNF in the same round, the first who DNF's is ranked lower.

6306.5.1 Tie Breaking

In the case that it is not possible to determine the ranking, then the ranking will be determined by the ranking in the qualification phase or seeding of the competitors. Then the competitor(s) with the better rank will break the tie.

6600 Halfpipe, Slopestyle and Big Air Scoring and Judging Criteria

6601 Scoring

6601.1 When judging events, only maneuvers performed in the course will be scored.
6601.2 Each judge may award up to 100 points for an averaged total of up to 100 points for each run. When there are more than 5 judges, the high and low judges scores are removed before averaging. Scores are used to rank the athletes, relative to the level of competition at each event.

A run that scores 65 at one event may score 75 at another event. The score is just a tool to organize the rankings and may vary based on the range and anchor score set for the day.

6601.3 The scorecard shall be used to record the score given by the judge

6601.4 A memory board shall be used by each judge to make all necessary notations depicting each competitor's run.

6601.5 If a competitor lands out of the halfpipe, they have ten seconds to reenter before they receive a DNF.

6601.6 Each competitor's scores must be posted after each run.

6602 Judging Format

6602.1 3-6 judges can be used at events

6602.2 The head judge or an experienced judge will call out the tricks for the whole judging panel to hear.

6602.3 Judges are allowed to discuss runs for the purpose of comparing runs and ranking them accordingly.

6602.3 The head judge must let a judge be heard if they have something to address, and will mediate discussions among judges.

6602.4 "Split panel" The head judge will intervene if the judging panel disagrees on an important ranking. After a comparison of the runs takes place the head judge may require a vote where the majority rules, in this case the minority may be required to adjust his/her score to fit the ranking of the majority.

6603 Judging Criteria

6603.1 Overall Impression

The judges will score the run by evaluating the overall impression criteria, including the execution, difficulty, variety, amplitude, combinations and progression of the run and the routine attempted.

6603.2 Overall Impression Criteria below should be used to evaluate the athletes' runs:

6603.2.1 Execution:

Execution encompasses many things: takeoff, landing, grabs, air, control, breaks in form, hand drags and crashes. It is important to recognize a well executed run as well as a poorly executed run and know how to score each appropriately. When determining execution each judge should ask themselves the following questions:

- How clean were the takeoffs? Always set clean, or were rushed and started prematurely?
- How long were the grabs held for?
- Did they maintain control in the air, or were there arm swings or flailing?
- Did they slide the rails cleanly to the end? Or did they come off early?
- How clean were the landings? Any hand drags or butt checks?

6603.2.2 Difficulty:

It is important to estimate the difficulty of a trick. Consider the following when

determining difficulty:

- Amount of rotation
- Direction of rotation (left/right, natural/unnatural)
- Direction of movement (switch/forward)
- Different grabs can make a trick considerably more difficult especially in greater rotations
- Axis of the trick: upright, off-axis, inverted, flat-spin/rodeo, double-cork
- Creative lines and transfers can definitely make a run more difficult

6603.2.3 Amplitude:

This measures the energy of the run that is shown by the height of each maneuver off the terrain features. Bigger amplitude can accentuate a clean, well-executed trick and leave a strong impression. Take note of the level of amplitude throughout the run. Consistent high amplitude all the way down the pipe should be rewarded. Maintained amplitude requires excellent takeoffs, landings, line and travel through the flat bottom.

6603.2.4 Variety:

A good run has a variety of tricks, grabs and axis'. Variety shows that the competitor has a complete repertoire of tricks. Look for the following in a run with good variety:

- Multiple directions of movement (forward and switch)
- Multiple directions of rotations (right-side and left-side)
- Multiple axis': upright, off-axis, inverted, flat-spin/rodeo, double-cork
- Multiple grabs: no one wants to see the same grab on every trick. Award a variety of grabs.
- PIPE: down the pipe spins and alley-oop spins (up the pipe spins)

6603.2.5 Combinations:

Combinations are multiple tricks linked together. It is more difficult to do hard tricks back-to-back, increasing the risk and therefore the difficulty of the run. Solid combinations can add to the positive impression of a run and should be rewarded. There should be NO reverts. If a trick is landed switch the competitor should continue switch into the next feature. A revert shows a break in flow and an inability to link multiple tricks. Tricks should flow from one to another.

6603.2.6 Progression:

In order to recognize progression a judge must have a current knowledge of competitive Freeskiing. New and progressive tricks keep our sport moving forward and should be rewarded. Arguably, progressive tricks can still be rewarded without perfect execution. The following elements of a run that fall under the progression criteria:

- New and uncommon tricks
- New or more technical axis' or rotations
- New, uncommon or difficult grabs
- New Variations of existing tricks or grabs
- Creativity (grabs, line, use of the course)

6604 Scoring Procedures

6604.1 Practice Judging: Judges must observe training and practice judging at the event.

6603.2 Set the Range: After identifying an average run and an average score during practice, judges should start discussing scores for other runs witnessed throughout the rest of practice.

6604.3 As a guideline scores can be broken down into the following ranges:

Crash Score: 1-40 points.

- 1-10 points is a crash at the start of the course
- 10-20 points is a crash on the first half of the course
- 20-30 points is a crash on an otherwise solid run
- 30-40 points is a crash at the end of an excellent run

Below Average: 40-55 points.

- Low degree of difficulty
- Poor execution and missed grabs
- Major deductions: Hand drag, Butt check, Etc.

Average: 55-70 points.

- Represents the level of the majority of the field
- Watch practice and note average runs. Use the average to set the range for your scores

Above Average/Good: 70-85 points.

- Good execution
- No deductions or insecurities
- A solid trick flow and a few good combinations
- Many difficult tricks

Excellent: 85-95 points

- Perfect execution
- Many difficult tricks linked together consecutively
- A variety of tricks, grabs and axis'
- A score higher than 95 states that it was one of the greatest runs ever landed in competition.

6604.4 Tie-breaking

If two or more competitors obtain the same score in the best run of two, the tie will be broken by comparison of the two highest counting judge's scores in the best run. If they still remain tied, the three highest counting scores in the best run shall determine the winner. If they are still tied, the competitor who obtained the highest total score in the other run will be ranked first. If they remain tied, the two highest counting judge's scores in the other run will determine the winner. If they remain tied, the three highest counting judge's scores in the other run will determine the winner.

APPENDIX A

Technical Specifications for Courses

Aerials

Inrun: The area above the inrun transition and table that allows the skier to achieve the necessary speed to leave the jump and perform the specific maneuver.

Length: 60 m \pm 5 m
Width: 30 m
Pitch: 23° \pm 3°

Inrun Transition: The area between the table and inrun that provides a smooth change of terrain in the jumps.

Length: 9 m \pm 3

Table: The area where the jumps are located just after the inrun transition and before the hill knoll.

Length: 23 m \pm 3
Width: 30 m
Pitch: 2.5° \pm 1°

Landing Hill: The steep area where the skier lands the aerial maneuver.

Length: 30 m \pm 3 m
Top width: 30 m
Bottom width: 30 m
Pitch: 36° \pm 1°

Outrun Transition: The area just after the landing hill that provides a smooth change in terrain to the outrun.

Length: 9 m \pm 1 m

Outrun: The finish area that allows the skier to come to a safe and controlled stop.

Length: 35 m \pm 5 m
Width: 30 m
Pitch: 5° \pm 5°

Uprights

Jump Dimensions:	Jump 1	Jump 2	Jump 3
Distance to knoll:	13 m \pm 1	7 m \pm .5	4.0 m
Length of jump:	6.0 m	4.5 m	3.5 m
Height of jump:	2.0 m	1.6 m	1.2 m
Width of jump:	1.2 m	1.2 m	1.2 m
Pitch of takeoff:	40° \pm 2	37° \pm 2	34° \pm 2°

Criteria for Inrun Angles and Lengths:

Pitch of inrun	Length of inrun	Length of Table
22°	65 m	20 m
23°	64 m	21 m
24°	62 m	21 m
25°	60 m	23 m
26°	58 m	24 m
27°	57 m	25 m
28°	55 m	26 m

Note: Proposal to increase upright jump angle by 2°.

Inverts

Jump Dimensions:	Single	Double	Triple
Distance to knoll:	4.0 m	6.5 m	8.0 m
Length of jump:	5.5 m	6.0 m	8.3 m
Height of jump:	2.0 m	3.5 m	4.0 m
Width of jump:	1.5 m	1.5 m	1.5 m
Pitch of takeoff:	50°	65°	70°

Moguls and Dual Moguls

	Moguls	Dual Moguls
Length:	235 m ± 35	200 ± 50
Width:	20 m ± 5	6.5 m ± 0.5 m
Pitch:	28° ± 4°	26.0 ± 5°
Start to Judges:		300 m
Control Gates:		8 -12 m wide
Course Length:		235 m ± 35 m
Finish Area:		30 m - 60 m

No section measuring 20 m in length may be flatter than 20° or steeper than 37°.

Air Bumps

Air Bump Criteria and Specifications	Measurement
Maximum Distance - the end of the last bump to the takeoff	4.0 m - 5.0 m
Maximum Distance - air bump takeoff to end landing (LZ)	15.0 m
Jump Height (JH)	50 m - 60 cm
Landing Zone Angle (LZ) in degrees	Greater than 26°
Takeoff Angle (TA) in degrees of jump	26° to 30°
Air Bump Width (not less than)	120 cm

Slopestyle

Course will be set up in a terrain park using multiple features. At least two of the features must be different nature (e.g. one rail and one jump). A difficult and an easy option on each feature is best. Judged features should be marked so it is obvious what is being used.

Jump recommended guidelines

Height:	1 m - 5 m
Distance to knuckle:	4 m - 20 m
Landing hill length = double distance to knuckle:	10 m - 40 m
Landing hill pitch:	32° ± 5°
Takeoff angle:	must equal landing hill pitch ± 3°

Quarterpipe

Pipe height:	min 4 m
Takeoff angle:	min 1.2 m wide at 88° last 1 m
Transition:	min 6 m
Base width:	min 6 m

Recommended sloping back deck
Optional additional hip takeoff

Note: One meter equals 3.28 feet

APPENDIX B

Technical Specifications for Divisional Aerial Novice Difficulty Courses* (Terrain Park may be used)

*Note: Eastern B events may exclude the Single Invert Kicker (Jump 5) and replace with a double block Small** as defined in the specs below.

Aerials recommended guidelines

Inrun:

Length:	35 m - 70 m
Width:	12 m - 20 m
Pitch:	$23^\circ \pm 3^\circ$

Transition:

Length:	$9 \text{ m} \pm 3 \text{ m}$
---------	-------------------------------

Table:

Width:	12 m - 20 m
Pitch:	$0^\circ \pm 3.5^\circ$

Landing Hill:

Length:	18 m - 30 m with a min. 15 m chopped for inverts
Top Width:	6 m - 20 m
Bottom Width:	12 m - 20 m
Pitch:	$32^\circ \pm 4^\circ$
Finish Area:	30 m - 60 m

The in-run must not be so long as to offer skiers speed that would place them too far down the hill. It must provide a smooth transition to outrun area large enough for the skier to come to a safe and controlled stop. Depending on the venue and the level of competitors, appropriate combinations of these jumps may be used.

Jump Dimensions:

	Small	*Small	Med. (7 m)
Distance to knoll:	4 m	4 m	7 m
Length of jump:	5 m	5 m	4.5 m
Height of jump:	1.2 m	1.2 m	1.6 m
Width of jump:	1.2 m	2.4 m	2 m - 5 m
Pitch of takeoff:	$32^\circ \pm 2^\circ$	$47^\circ \pm 2^\circ$	$36^\circ \pm 2^\circ$
	Large	Single	Novice (optional)
Distance to knoll:	14 m	4 m	1.5 m
Length of jump:	7 m	5.5 m	3 m
Height of jump:	3 m	2 m	0.8 m
Width of jump:	2 m - 5 m	1.5 m	1.2 m
Pitch of takeoff:	$36^\circ \pm 4^\circ$	50°	$28^\circ \pm 2^\circ$

*A Small may be offered as a double wide block with novice invert specs (Eastern B meets will offer these specs for non-scored events)

Moguls

Length: 175 m \pm 25 m

Width: 15 m

Pitch: 16° minimum

4 sets of control gates dividing the course into 5 equal sections are to be set at the maximum width of the course.

APPENDIX C

Technical Specification for Halfpipe

Halfpipe Dimensions

Technical Data	Minimum	Maximum
Inclination	14°	18.5°
Length	100 m	165 m
Width	14 m	20 m
Wall Height	3.5 m	7 m
Transition radius	3 m	7.2 m
Exact Dimensions		
Vertical	0.3 m at 85°	
Bottom Flat	5 m one snowcat width	
Drop in Area	4 m	
Banner fence from wall	2 m	
Outside fence from banners	1 m	

Thank You

CODE OF CONDUCT

Membership in U.S. Ski & Snowboard is a privilege, not a right. All U.S. Ski & Snowboard members when participating in any U.S. Ski & Snowboard activity, must agree to conduct themselves according to U.S. Ski & Snowboard's core values of Integrity, Passion, Fun, Team, Community, Excellence, and Grit and abide by the spirit and dictates of this Code of Conduct. All members must agree to comport themselves in a sportsmanlike manner, and are responsible for their actions while attending or participating in all U.S. Ski & Snowboard activities (including but not limited to camps, competitions, and projects).

Sportsmanlike conduct is defined as, but is not limited to: respect for competition officials, resort employees, fellow members, and the skiing and snowboarding public, respect for facilities, privileges and operating procedures, the use of courtesy and good manners, acting responsibly and maturely, refraining from the use of profane or abusive language, and abstinence from illegal or immoderate use of alcohol and use of illegal or banned drugs.

While participating in any U.S. Ski & Snowboard activity:

1. U.S. Ski & Snowboard members shall be subject to the jurisdiction of the International Ski Federation (FIS) Statutes, the United States Olympic Committee (USOC) Bylaws, the U.S. Ski & Snowboard Bylaws, and the U.S. Ski & Snowboard Code of Conduct.
2. U.S. Ski & Snowboard members shall conduct themselves at all times and in all places as befits worthy representatives of the United States of America, the United States Olympic Committee, U.S. Ski & Snowboard, their region, division, state or club and in accordance with the best traditions of national and international competition.
3. U.S. Ski & Snowboard members are responsible for knowledge of and adherence to competition rules and procedures. Members are also responsible for knowledge of and adherence to the rules and procedures of the U.S. Ski & Snowboard national teams, camps or other projects when participating in such.
4. U.S. Ski & Snowboard members shall maintain high standards of moral and ethical conduct, which includes self-control and responsible behavior, consideration for the physical and emotional well being of others, and courtesy and good manners.
5. U.S. Ski & Snowboard members shall abide by U.S. Ski & Snowboard rules and procedures while traveling to and from and participating in official U.S. Ski & Snowboard activities.
6. U.S. Ski & Snowboard members shall abstain from illegal and/or immoderate consumption of alcohol. Absolutely no consumption of alcohol is permitted for those individuals under the age of 21. Members under 21 years of age shall not participate in gatherings involving consumption of alcohol unless it is an official U.S. Ski & Snowboard or event organizer function.
7. No U.S. Ski & Snowboard member shall violate the customs, travel or currency regulations of a country while traveling with a U.S. Ski & Snowboard group or on a U.S. Ski & Snowboard ticket.

8. No U.S. Ski & Snowboard member shall commit a criminal act.
9. No U.S. Ski & Snowboard member shall engage in any conduct that could be perceived as harassment based upon gender, age, race, religion, disability or sexual orientation.
10. U.S. Ski & Snowboard members will avoid profane or abusive language and disruptive behavior.
11. U.S. Ski & Snowboard members agree to abide by anti-doping rules and procedures established by the World Anti-Doping Agency (WADA), the U.S. Anti-Doping Agency (USADA), and/or FIS.

Failure to comply with any of the above provisions may lead to disciplinary action by the appropriate team or competition leader. Disciplinary action may include:

- Removal from the team trip or training camp.
- Suspension from training and/or competition.
- Elimination of coaching, travel, and other benefits.
- Forfeiture of U.S. Ski & Snowboard membership.

U.S. Ski & Snowboard is committed to principles of fairness, due process and equal opportunity. Members are entitled to be treated fairly and in compliance with U.S. Ski & Snowboard's Bylaws, policies and procedures. Members are entitled to notice and an opportunity for a hearing before being prevented from participating in protected competition as that term is defined by the USOC Bylaws. Information on the processes for grievances, suspensions and appeals is available at usskiandsnowboard.org.

Nothing in this Code shall be deemed to restrict the individual freedom of a U.S. Ski & Snowboard member in matters not involving activities in which one could not be perceived as representing U.S. Ski & Snowboard. In choices of appearance, lifestyle, behavior and speech while not representing U.S. Ski & Snowboard, competitors shall have complete freedom, provided their statements and actions do not adversely affect the name and reputation of the U.S. Ski & Snowboard. However, in those events where one is representing or could be perceived as representing U.S. Ski & Snowboard, U.S. Ski & Snowboard demands that its members understand and agree to behave in a manner consistent with the best traditions of sportsmanship and U.S. Ski & Snowboard's core values.

CONCUSSION CHECKLIST

Signs and Symptoms

Athletes who show or report one or more of the signs and symptoms listed below, or simply say they just “don’t feel right” after a bump, blow, or jolt to the head or body, may have a concussion or more serious brain injury.

Signs Observed by Coaches / Officials	Symptoms Reported by Athlete
Appears dazed or stunned	Headache or "pressure" in head
Moves clumsily	Nausea or vomiting
Answers questions slowly	Balance problems or dizziness
Loses consciousness (even briefly)	Double or blurry vision
Shows behavior, or personality changes	Bothered by light or noise
Can't recall events prior to hit or fall	Feeling sluggish, hazy, foggy or groggy
Can't recall events after hit or fall	Confusion, or concentration or memory problems
	Just not "feeling right" or feeling down

Action Plan

If you suspect that an athlete has a concussion

1. Remove the athlete from training and competition,
2. Provide athlete/family with U.S. Ski & Snowboard’s concussion information and medical evaluation forms,
3. Notify jeff.weinman@usskiandsnowboard.org of suspected concussion,
4. The athlete will be placed on U.S. Ski & Snowboard medical hold until the completed medical evaluation form is received with the signature of a medical professional who has been trained in concussion management within the past three years.

PROTEIN

Ted Ligety
5x World Champion

High protein for high performance.

World-class athletes need the right amount of protein to help them perform at the highest level. And Rockin' Refuel has loads of it. It's made with 30 grams of high-quality, natural protein and only 6 grams of sugar. So it's the perfect aid to help you build and rebuild muscles and give you the sustained energy you need to perform at your best. And because it's made with real Shamrock Farms milk, it also has a great taste.
